## Most recent information

We request that you always use the latest driver version for this unit. For information about the latest driver, check the TEAC Global Site (**http://teac-global.com/**).

## Maintenance items

### For Windows Driver

* After the Windows 8.1 update (KB 2919355) was installed, if a 24-bit option was selected for "Select the sample rate and bit depth to be used when running in shared mode" while a TASCAM USB audio interface was connected, the computer would restart when a Windows system sound played. This is been fixed.

**Support models**

| Model name | latest driver version | | | latest firmware version |
|---|---|---|---|---|
| | Windows Vista | Windows 7 | Windows 8.1 | |
| US-200 | 1.01 | 1.02 | | 1.01 |
