1 – Introduction

Features

- Compact audio recorder that uses SD/SDHC/SDXC cards as recording media
- Built-in with high performance directional stereo microphones in XY positions
- Mid-side decoding function can be used with MS microphones
- Simultaneous recording of up to four channels is possible
- Built-in four-track MTR feature
- Built-in Wi-Fi feature to use smartphone as remote control, transfer files from the PCM recorder, and play back audio
- 44.1/48/96 kHz, 16/24-bit, linear PCM (WAV format) recording possible
- Compatible with the BWF format
- 32–320 kbps MP3 format recording possible (compatible with ID3 tag v2.4)
- The dual recording feature allows two files to be recorded simultaneously at different levels
- Supports dual format recording (WAV/MP3)
- Built-in 0.3 W monaural output monitor speaker
- Built-in effector (reverb) function can be used during recording and playback
- Auto-record function starts recording automatically when a set sound input level is detected
- Track incrementing function allows you to update a file at a preset time or at desired position without interrupting recording
- Pre-recording (PRE REC) function allows the unit to record the 2 seconds of sound before recording is activated
- Peak reduction function is available to reduce the level automatically in case of excessively large input
- Limiter function is available to reduce the level automatically in case of excessively large input
- Low-cut filter conveniently reduces low-frequency noise
- VSA function can change the playback speed in the range from 0.5 to 2.0 times (in 0.1 increments) the normal speed without changing pitch
- Repeat playback and IN-OUT loop playback functions

Conventions used in this manual

In this manual, we use the following conventions:

- When we refer to buttons, connectors and other parts of this unit and other equipment, we use a bold font like this: MENU button.
- When we show messages, for example, that appears on the unit’s display, the typeface looks like this: REPEAT.
- Highlighted area on the DR-44WL display is indicated as a “cursor”.
- SD/SDHC/SDXC memory cards are referred to as “SD cards”.
- Words that appear on the computer display are shown in quotation marks like this: “DR-44WL”.
- The selected folder is indicated as the “current folder”.
- A computer or a smartphone that is connected with the DR-44WL via Wi-Fi is referred to as the “Wi-Fi device”.
- Additional information is provided as “tips”, “notes”, and “caution” as required.

TIPS
These are tips about how to use the unit.

NOTE
These provide additional explanations and describe special cases.

CAUTION
Failure to follow these instructions could result in injury, damage to equipment or lost recording data, for example.

This product has a Blackfin® 16/32-bit embedded processor made by Analog Devices, Inc. This processor controls digital signal processing. Inclusion of this Blackfin® processor in the product increases its performance and reduces its power consumption.
About SD cards

This unit uses SD cards for recording and playback. You can use 64 MB to 2 GB SD cards, 4 GB to 32 GB SDHC cards, and 64 GB to 128 GB SDXC cards with this unit. A list of SD cards that have been confirmed for use with this unit can be found on the TEAC Global Site (http://teac-global.com) or contact the TASCAM customer support service.

Precautions

SD cards are delicate media. Please refer to the below when using memory cards to prevent memory and/or card damage:

• Do not leave a memory card in extremely hot or cold places
• Do not leave a memory card in extremely humid places
• Do not spill any liquids on the memory card
• Do not bend the card or subject it to any excessive force
• Do not subject the card to any physical shock
• Do not remove the card while the unit is accessing data, or recording, playing, or making data transfer
• Always store the memory card in a case
2 – Names and functions of parts

Top panel

1 Built-in stereo microphone
   This is a directional stereo and electret condenser microphone.

2 PEAK indicator
   Lights (red) when the input volume is too high (−2 dB).

3 Display
   Displays a variety of information.

4 TRACK/INPUT button
   During recording standby (4 CH mode) or when stopped
   (MTR mode), press this button to select the channel (track)
   to record.
   When the INPUT LEVEL setting screen pops up, press
   this button to select the channel (track) for adjusting the
   input level.
   When the INPUT SETTING screen is displayed, press
   this button to show the track for setting.

5 ■/HOME button
   If you want to pause, press the button again.
   Press this button during pause time to return to the
   beginning of the file.
   Press this button during recording or recording standby
to cause the recording to stop.
   To return to the Home screen, press this button in any screen
display. Use this button to select “NO” to a confirmation
message.

6 ▼ button
   During playback or when stopped in the middle of a file,
press to return to the beginning of the file.
When the IN and OUT points are set between the current
position and the end of the playback file, pressing this
button skips to those points.
If you press this button when a track is stopped at its
beginning, the unit will skip to the beginning of the previous
track.
Press and hold this button to search backwards.
Press this button while pressing and holding the ENTER/
MARK button to return to the previous mark.
On the setting screens, use this button to move the cursor left.

On the BROWSE screen, press this button to move up a
level.

7 ▶/II button
   To start playback in the Home screen, press this button while
in stop mode.
If you want to pause, press the button again.
When a file or folder is selected on the BROWSE screen,
press this button to return to the Home screen and play the
file or the first file in the folder from the beginning.

8 MENU button
   When the Home screen is displayed, press this button to
open the MENU screen.
   Press this button to return to the MENU screen from the
   various setting screens.

9 MTR indicator
   Lights up when the operation mode is in MTR mode.

10 MIXER button
   Press this button to open the MIXER screen.
   When the MIXER screen is open, press this button to
   return to the Home screen.

11 RECORD button/REC indicator
   When you press this button during stop mode, the REC
   indicator flashes and the DR-44WL will go into recording
   standby mode.
   When you press this button during the recording standby
   mode, the REC indicator lights and the DR-44WL starts
   recording.
   When you press this button during recording, the REC
   indicator flashes.
   When in MTR mode, stopped or playing back, press this
   button to start recording.

12 ► Fast forward button
   Press this button in playback or stop mode to skip to the
next track.
When the IN and OUT points are set between the current
position and the end of the playback file, pressing this
button skips to those points.
Press and hold this button for fast forward search.
On the setting screens, use this button to move the cursor
right.
Press this button while pressing and holding the ENTER/
MARK button to move forward to the next mark.
On the BROWSE screen, press this button to move down
a level. If a file is selected, the file is loaded and the unit
returns to the Home screen.

13 INPUT button
   Press this button to open the INPUT SETTING screen.
   When the INPUT SETTING screen is open, press this
   button to return to the Home screen.

14 ENTER/MARK button
   Use this button to confirm selections or select “YES” to a
confirmation message.
Press this button during recording to add a mark manually.
(see “Manual cue marking during recording” on page 26)
While pressing and holding this button during playback,
press the ▼ button to return to the previous mark or
press the ► button to move forward to the next mark.
(see “Moving to the cue mark position” on page 27)
When the PLAY FUNCTION screen is open, use this
button to set the IN (start) and OUT (end) points of the
interval that you want to set for loop playback. When the IN
(start) and OUT (end) points are already set, press this button
to clear the IN and OUT points.
2 – Names and functions of parts

15 QUICK button
When the Home screen, PLAY FUNCTION screen, BROWSE screen or SONG screen is open, press this button to pop up the quick menu. (see “QUICK button overview” on page 38)

16 Wheel
This is used to select items or change value on setting screens. Also used to change the playback position in a file.

Front panel

17 Wi-Fi indicator
Indicates the status of wireless LAN.
Lights off: OFF
Blinks: Waiting to be connected
Lights on: Operable from the exclusive application (DR CONTROL)

18 EXT MIC/LINE IN 1/L / 2/R jack (XLR/TRS)
These are balanced analog XLR/TRS combo jacks for microphone and line level inputs.
XLR (1: GND, 2: HOT, 3: COLD)
TRS (Tip: HOT, Ring: COLD, Sleeve: GND)

CAUTION
• Confirm that phantom power is OFF before connecting a line level device to these EXT MIC/LINE IN jacks. If you connect a line level device while phantom power is being supplied, that device and this unit could be damaged.
• When connecting to or disconnecting a condenser microphone from the EXT MIC/LINE IN jack, confirm that the phantom power for that jack is OFF. If you connect or disconnect a microphone while phantom power is being supplied, that microphone and this unit could be damaged.
• Do not connect an unbalanced dynamic microphone to an XLR connector when phantom power is being supplied. Doing so could damage that microphone and this unit.

Left side panel

19 SD card slot
Insert or remove a SD card.

20 HOLD/√ / I switch
To turn the power on/off, slide and hold the switch towards the √ / I icon.
When you slide the switch towards the HOLD side, all the functions of the buttons are locked.

21 √/LINE OUT jack
A headphone or a line input jack of an external device (via stereo mini-jack cable) can be connected to this jack.

22 OUTPUT LEVEL button
These buttons adjust the output sound level of the built-in speaker or the √/LINE OUT jack.
During adjustment, a volume indicator will be displayed in a pull-up window.

23 Wi-Fi button
Use this button to turn on/off the Wi-Fi function.

Right side panel

24 EXT IN switch
Set the gain for the EXT MIC/LINE IN jack and whether phantom power is on or off.

25 INPUT LEVEL button
Press this button to show the INPUT LEVEL setting screen on the display as a pull-down menu.
When the INPUT LEVEL setting screen is shown, press this button to close the pull-down menu.

26 INPUT LEVEL volume
When the INPUT LEVEL setting screen is shown, use this to adjust the input level.

27 USB port
Use the supplied USB cable to connect the DR-44WL with a computer. (see “11 – Connecting with a computer” on page 47)
Power can be supplied through the USB cable included within this unit package or the dedicated AC adapter (GPE053B) supplied with this unit.

CAUTION
Connect the DR-44WL directly be connected directly with the computer, not through a USB hub.
2 – Names and functions of parts

**Bottom panel**

- **Built-in mono speaker**
  Use this built-in speaker to listen to recordings.
  No sound will play when:
  - In recording standby
  - Headphone is connected
  - In recording mode
  - Speaker output setting is turned off

- **Tripod attachment screw-hole (1/4 inch)**
  A tripod can be attached to the DR-44WL.

  **CAUTION**
  - Ensure the tripod or microphone stand screws are securely fastened to prevent the unit from falling off.
  - When attaching this unit to a tripod or microphone stand, ensure to place it on a level surface.
  - Some tripods have different screw specifications that make direct connection impossible. Use a commercially-available adapter with such tripods.

- **Battery compartment cover**

- **Strap holder**
  A strap can be attached to this holder.

- **Battery compartment**
  Insert four AA batteries into the compartment to power the unit. (see "Using AA size batteries" on page 12)

**Home Screen**

1. **Playback speed status display**
   One of the following icons appears according to the playback speed setting.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Playback speed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blank</td>
<td>Playback speed not changed</td>
</tr>
<tr>
<td>×1.1 – ×2.0</td>
<td></td>
</tr>
<tr>
<td>×0.5 – ×0.9</td>
<td></td>
</tr>
<tr>
<td>When the playback speed cannot be changed</td>
<td></td>
</tr>
</tbody>
</table>

2. **Display of the key control function on/off status**
   This icon shows whether the key control function is on or off.

<table>
<thead>
<tr>
<th>Icon</th>
<th>On/off status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blank</td>
<td>Key control function off</td>
</tr>
<tr>
<td>KEY</td>
<td>Key control function on</td>
</tr>
<tr>
<td>KEY</td>
<td>Key control function on (setting disabled state)</td>
</tr>
</tbody>
</table>

3. **Reverb on/off status display**
   This icon shows the reverb on/off status.

<table>
<thead>
<tr>
<th>Icon</th>
<th>On/off status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blank</td>
<td>Reverb is off</td>
</tr>
<tr>
<td>REVERB</td>
<td>Reverb is on (sound effects recording)</td>
</tr>
<tr>
<td>REVERB</td>
<td>Reverb is on (SEND status)</td>
</tr>
</tbody>
</table>

4. **Speaker output display**
<table>
<thead>
<tr>
<th>Icon</th>
<th>On/off status</th>
</tr>
</thead>
<tbody>
<tr>
<td>●</td>
<td>Speaker output on</td>
</tr>
<tr>
<td>Blank</td>
<td>Speaker output off</td>
</tr>
</tbody>
</table>
5 Phantom power supply display
Blank: No phantom power supply
48V: 48V phantom power supplied
24V: 24V phantom power supplied

6 Power supply status message
When power is supplied from the batteries, the current battery level is displayed in bars (1, 2, 3). When the battery level is low, the 4 will flash and the power will be switched off (standby mode).
When the dedicated AC adapter (GPE053B) supplied with the product or USB bus power is used, 5 appears.

NOTE
When attempting recording or other operations that consume large amount of power, a warning message of Battery Low may pop-up.

7 Recorder status message
The recording status is indicated in the following icons:

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>■</td>
<td>Stop</td>
</tr>
<tr>
<td>■</td>
<td>Pause</td>
</tr>
<tr>
<td>▶</td>
<td>Playback</td>
</tr>
<tr>
<td>▶▶</td>
<td>Fast-forwarding</td>
</tr>
<tr>
<td>▼▼</td>
<td>Fast-rewinding</td>
</tr>
<tr>
<td>▶▶</td>
<td>Skip forward to the beginning of the next file</td>
</tr>
<tr>
<td>▼▼</td>
<td>Skip backward to the beginning of either the current or preceding file</td>
</tr>
</tbody>
</table>

8 Loop playback setting status display
During loop playback, the 8 icon is displayed.

9 Filename/song name display
When the 4CH mode is selected, the name or tag information of a file being played back is shown. The ID3 tag information is displayed instead when included in the MP3 file.
When there are multiple files in the 4CH mode, only the format portion of each of the file names and the basic number of a recording file are displayed. When a single file is recorded, its name is shown.
When the MTR mode is selected, the name of an opened song is shown.

NOTE
ID3 tag information contains titles and artist names, which can be stored in MP3 files.

10 Loop playback IN (starting) and OUT (ending) points setting status
The IN (starting) and OUT (ending) points-setting state of the loop playback is shown.
When the IN (starting) point is set, the 9 icon appears at the set position on the playback position-displaying bar.
The 9 icon appears at the playback position on the bar when the OUT (ending) point is set.

11 Playback position display
The current playback position is shown by a bar. As playback progresses, the bar extends to the right.

12 Level meter guide display
This is a level meter guide for adjusting the input and output levels. It is displayed at the “−12 dB” position of the scale.

13 Level meter
This meter displays the level of an input sound or that of a playback sound.

14 File status display
The file status is displayed in different ways, depending on the type of a file to be played back.

15 Elapsed time display
Displays the elapsed time (hours: minutes: seconds) of the current file.

16 Remaining time display
Displays the remaining time (hours: minutes: seconds) of the current file.

17 Peak value displayed in decibel (dB)
Displays the maximum playback level in decibel reading per set amount of time.

Recording Screen
The following recording screen is displayed in recording or recording standby mode.
2 – Names and functions of parts

2. Reverb on/off status display
This icon shows the reverb on/off status.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blank</td>
<td>Reverb is off</td>
</tr>
<tr>
<td>OFF</td>
<td>Reverb is on (sound effects recording)</td>
</tr>
<tr>
<td>ON</td>
<td>Reverb is on (SEND status)</td>
</tr>
</tbody>
</table>

3. Phantom power supply display
Blank: No phantom power supply
48V: 48V phantom power supplied
24V: 24V phantom power supplied

4. Recording status message
The recording status is indicated in the following icons:

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>• II</td>
<td>Recording standby or recording pause mode</td>
</tr>
<tr>
<td>•</td>
<td>In recording mode</td>
</tr>
<tr>
<td>✂</td>
<td>Self-timer recording activated</td>
</tr>
</tbody>
</table>

5. Display of the setting status of the PRE REC or Auto REC function (4CH mode only)
When the PRE REC function is 0 H, the icon appears.
When the AUTO REC function is 0 H, the icon appears.

6. Filename/song name display
Displays the file name automatically assigned to the recording file.
When there are multiple files in the 4CH mode, only the format portion of each of the file names and the basic number of a recording file are displayed. When a single file is recorded, its name is shown.
When the MTR mode is selected, the name of an opened song is shown.

7. Level meter guide display
This is a level meter guide for adjusting the input and output levels. It is displayed at the “-12 dB” position of the scale.

8. Level meter
Displays the input sound level.
The mark is given at the “-12 dB” position on the scale as a guide mark for input level adjustment.

9. File status display
The file state is displayed in different ways, depending on the type of a file to be recorded.

<table>
<thead>
<tr>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2</td>
<td>3</td>
<td>4</td>
</tr>
</tbody>
</table>

10. Elapsed recording time
Displays the elapsed recording time of a recorded file (hours: minutes: seconds).

11. Remaining recording time
The remaining time left on the SD card is shown in hours: minutes: seconds.

12. Peak decibel (dB) message
Displays the peak input level in decibel reading.

Menu item list
Press the MENU button to open the MENU screen. Menu items are as follows:

<table>
<thead>
<tr>
<th>Menu item</th>
<th>Function</th>
<th>Ref. page</th>
</tr>
</thead>
<tbody>
<tr>
<td>MODE</td>
<td>Switch the operation mode of this unit.</td>
<td>see page 16</td>

Using menus

The following explains the menus, using the display contrast setting as an example.

1. Press the MENU button to open the MENU screen.

2. Use the wheel to select a menu item (highlighted), and press the ENTER/MARK or ➤➤ button to move to various settings screens.

3. Use the wheel to select an item to set (highlighted).

4. Press the ENTER/MARK or ➤➤ button to move the cursor to highlight the setting.

5. Use the wheel to change the setting.

6. Press the ENTER/MARK or ◀◀ button to set a different item in the same menu. This enables you to select a new item. Use the wheel to select an item to be set (highlighted).

7. Repeat the 3. to 6. steps to set each items, as necessary.

8. Press the MENU button to return to the MENU screen. Press the HOME button to return to the Home screen.

Basic operations

Use the following buttons to operate the various screens.

MENU button
Opens the MENU screen.

HOME button
To return to the Home screen, press the HOME button in any screen display. Use this to answer "NO" to a confirmation message.

ENTER/MARK button
Use this button to confirm selection of a setting item or to select "YES" to a confirmation message.

➤➤ button
Use this to move the cursor (the highlighted area) to the right on the screen or to open folders on the BROWSE screen.

◀◀ button
Use this to move the cursor (the highlighted area) to the left on the screen, and to close folders on the BROWSE screen.

Wheel
Use this to select (highlight) each item or to change value.

MIXER button
Open the mixer screen.

INPUT button
Open the INPUT SETTING screen.

QUICK button
This opens the quick menu pop-up. (see "QUICK button overview" on page 38)
3 – Preparation

Powering the unit

Power sources

The DR-44WL operates on four AA batteries, the dedicated AC adapter (GPE053B) included with the unit or USB cable supplied with the unit (USB bus power). Use either alkaline batteries or Ni-MH batteries.

Using AA size batteries

Remove the battery compartment cover on the back of the unit, insert four AA batteries into the battery compartment, aligning to the + and - markings inside the battery compartment, and close the cover.

Select the same type of batteries to get an accurate reading of the remaining battery power and required minimum power for operation. (see “Battery type settings” on page 53)

CAUTION

• Do not use Manganese dry cell batteries.
• Ni-MH batteries will not be recharged with this unit; use a separate battery recharger instead.
• The supplied alkaline batteries are for testing and may not last long.

NOTE

A large amount of power is consumed to provide phantom power to a condenser microphone. If you use a condenser microphone while running the unit on AA batteries (NiMH rechargeable or alkaline), the operating time will be extremely shortened.

If you need to operate the unit for a long time, use the dedicated AC adapter (GPE053B) included with the unit or TASCAM BP-6AA external battery box (sold separately) to power the unit.

Using an AC adapter

Connect the dedicated AC adapter (GPE053B) supplied with the unit and the USB port of the unit with the included USB cable as shown in the illustration.

NOTE

When both batteries and the AC adapter are attached to the unit, power will be supplied from the AC adapter.

CAUTION

• Use only the dedicated AC adapter (GPE053B) supplied with the unit. The use of another adapter may cause malfunction, fire or electric shock.
• Noise may occur during microphone recording when the unit and AC adapter are in close proximity. If noise occurs, move the AC adapter away from the unit.

Using an external battery pack (sold separately)

Connect a TASCAM BP-6AA external battery pack (designed for use with this unit and sold separately) to the recorder with the included USB cable as shown in the illustration. For details, see the BP-6AA Owner’s Manual.

NOTE

The DR-44WL cannot detect the remaining battery charge of a BP-6AA. If you use a BP-6AA to operate the DR-44WL without batteries in the recorder itself, the unit might stop operating suddenly if the battery pack runs out of charge. In order to avoid problems, put batteries with sufficient charge into the DR-44WL before connecting and using a BP-6AA.
Using USB bus power

Use the supplied USB cable to connect the unit and the computer as illustrated below.

When you connect a USB cable while the unit power is on, or turn on the power after making a connection, the USB SELECT screen will pop up, prompting the user to select either to operate the unit with USB bus power or make a USB connection with the computer.

Use the wheel to select BUS POWER (highlighted) and press the ENTER/MARK button to select power supply from the USB port. The Home screen will appear.

NOTE
Power is supplied from the USB port when USB cable is connected to the unit inserted with batteries (USB bus power prioritized).

CAUTION
• Depending on the USB bus power specifications of the computer, the DR-44WL may not operate with a USB connection. If this occurs, use the dedicated AC adapter (GPE053B) supplied with the unit instead.
• This unit is not compatible with the computer’s power-save mode or sleep-mode. Please turn off these modes when operating the unit from the computer’s USB bus power.

Turning the power on and off (standby mode)

CAUTION
• When you turn the power switch off while supplying power from the dedicated AC adapter (GPE053B) included with the unit or the USB bus power connected to a computer, the unit will go into standby mode.
• Before turning the power switch on and off, turn the volume down for the sound system connected to the unit.
• Do not wear headphones when turning the power switch on and off (standby mode); the noise may cause damage to your ears and/or headphones.

Starting up the unit

When the unit is turned off, slide the HOLD/switch of the left side panel in the | direction, and when the TASCAM DR-44WL (start-up screen) appears, release the switch. The DR-44WL starts up and the Home screen is displayed.

Shutting down (standby mode)

When the unit is turned on, slide the HOLD/switch of the left side panel in the | direction, and when the TASCAM DR-44WL shutting down appears, release the switch. The power turns off after the unit completes its shutdown process.

CAUTION
When turn the power on for the first time (or when the built-in clock is reset due to no battery power), the DATE/TIME screen will appear before the Home screen to set date/time.
(see “Setting the date/time” on page 14)

Always use the HOLD/switch to turn the power off. Do not remove the batteries or disconnect the power cable (AC adapter GPE053B included with the unit or USB cable) accidentally while the unit is operating. If you do so, the unit cannot shut down properly and all recordings, settings and other data will be lost. Any lost data and/or settings cannot be restored.
Resume function
The DR-44WL is equipped with a resume function to locate the previous position (or time) when the power was turned off. Turn the power on and press the button to play back from the previous file position (time) when the power was turned off.

NOTE
The position is recorded in the SD card. The resume function does not work if the SD card is replaced or formatted.

Setting the date/time
The DR-44WL uses its internal clock to record the date and time to the recorded files.

1. Press the button to open the screen.
2. Using the wheel, select (highlight) menu item and press the or button. The screen is displayed.
3. Using the wheel, select (highlight) DATE/TIME and press button.
4. Press the button again to display the screen.
5. Press the button or button to move the cursor (highlighted area), and use the wheel to change values.
6. Press the button to confirm the change and return to the screen.

NOTE
The file name will include the set date/time. (see “Setting the file name type” on page 52)

CAUTION
The date and time setting can only be maintained for a few minutes if the battery power becomes low or the unit is not powered by the dedicated AC adapter (GPE053B) included with the unit or USB cable.
When using batteries, we recommend to replace them before they are completely drained.

Inserting and removing SD cards

Inserting the SD card

NOTE
When the product is purchased, the SD card slot has an SD card already installed. If you want to use this SD card to record and play tracks, there is no need to reinstall it.
1. Open the SD card slot cover on the left side panel.
2. Insert the SD card into the slot as shown in the following illustration until it clicks into place.

Removing the card
1. Open the SD card slot cover.
2. Press the SD card in gently and then release it to allow it to come out.

CAUTION
• Do not remove the SD card from the unit during recording, playback or at other times when it is being accessed.
• Do not remove the SD card from the unit when it is connected to a computer via USB.
• SD cards that meet SD, SDHC or SDXC standards can be used with this unit.
• A list of SD cards that have been confirmed to work with this unit can be found on the TEAC Global Site (http://teac-global.com).
3 – Preparation

SD card write protection switches
An SD card comes equipped with a write protect switch.

![Unprotected and Protected SD cards]

If you slide the protect switch to the LOCK position, file recording and editing is not possible. Move the switch to the unlocked position in order to record, erase and otherwise edit data on the card.

Preparing an SD card for use
In order to use an SD card in this unit, you must format it first.

1. Confirm that an SD card is installed and turn the power ON.
2. The following message appears when a new card or a card formatted by another device is inserted into the unit.
3. Press the ENTER/MARK button to start formatting.

CAUTION
Formatting will delete all data from the card.

4. When formatting is complete, it will return to the Home screen. You may format the card whenever required.

CAUTION
When formatting the SD card, make sure the unit is connected to the dedicated AC adapter (GPE053B) included with the unit, a computer via USB bus power, or fully-charged batteries.

Turning the built-in speaker on/off
The factory setting for the built-in speaker output is selected as ON. To turn it off, open the TOOLS screen and select ON for the SPEAKER setting.

1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) TOOLS menu item and press the ENTER/MARK or button.
3. Using the wheel, select (highlight) SPEAKER and press the ENTER/MARK or button.
4. Using the wheel, turn on or off and press the ENTER/MARK button.
Options: OFF, ON (default setting)
5. Once the setting has been completed, press the HOME button to return to the Home screen.

NOTE
In a recording standby or recording mode, or when a headphone or a speaker system is connected to the DR-44WL, the built-in speaker will not emit sound even when the SPEAKER setting is ON.

Connecting a monitor device
To listen with a headphone, connect it to the /LINE OUT jack. External monitor system (powered monitor speaker or an amplifier and speaker): connect the external monitor system to the /LINE OUT jack.

Adjusting the playback volume
When the Home screen is being displayed, use the OUTPUT LEVEL (+/-) button on the left side panel to adjust the volume of output through the built-in speaker or the /LINE OUT jack. A volume level indicator will pull up at the bottom of the display.
3 – Preparation

Input settings

Recording with the built-in microphone
Point the built-in microphone toward the sound source and place the unit on a stable surface with minimum vibration.

Recording with an external microphone (EXT MIC IN)
Connect an external microphone to the EXT MIC/LINE IN jack of this unit.
Point the external microphone toward the sound source and place the unit on a stable surface with minimum vibration.

Recording from an external device (LINE IN)
Use stereo plug cables to connect to the output of an external audio device.

Selecting Operation Mode

Two operation modes are available in this unit: 4CH and MTR modes.

Setting a mode
1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) MODE menu item and press the ENTER/MARK or ► button.
   The MODE screen is displayed.
3. Using the wheel, select (highlight) MODE and press the ENTER/MARK or ► button.
4. Use the wheel to select operation mode.
   Options: 4CH (default value), MTR
5. Once the setting has been completed, press the 8/HOME button to return to the Home screen.

   NOTE
   The selected mode is stored and started in the selected mode when the power is turned on next time.

Checking mode
When the operation mode is set to MTR, the MTR indicator on the top of the display lights up.

CAUTION
- If the input sound is still distorted after adjusting the input level of the unit, reduce the playback sound of the external device.
- When an external audio device with a fixed output line level is connected, it would be impossible to control the gain level appropriately because of excessively large input signals. In such cases, use the headphone jack or other level-controllable output for connection to the unit.
In addition to the built-in microphone, an external microphone or external audio devices (i.e. CD player) can also be used for recordings. Recordings can be made in MP3 (32k - 320kbps, 44.1k/48kHz) and WAV/BWF (44.1k/48k/96kHz, 16/24-bit) audio formats. Cue marks in WAV file that supports BWF (Broadcast Wave Format) can be used in BWF compatible softwares.

**Overview of recording modes**

This recorder can record sounds in two modes: 4CH and MTR modes.

**4CH mode**

Up to four tracks can be recorded simultaneously from the built-in microphones and the external input terminal (the assignment of the input terminal is fixed).

Recorded files are created as follows according to the track setting.

- Stereo x 2
- Stereo x 1 + mono x 2
- Mono x 4

**MTR mode**

In addition to simultaneous recordings of up to four tracks from the built-in microphones and the external input terminal (the assignment of the input terminal is selectable), sounds, etc. can be recorded over an already recorded file.

Recorded files are created as follows according to the track setting.

- Mono x 4

**Set where to save the file**

Set the folder where recorded files are saved.

The recorded file will be saved in the current (currently selected) folder. For details, see the SELECT quick menu item under (see "Folder operations" on page 31). If no folder is specified, the file will be stored in the "MUSIC" folder.

**Select the file format and sampling frequency (4CH mode only)**

Select the desired audio file type before you start recording.

1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) REC SETTING and press the ENTER/MARK or ►► button.

   The REC SETTING screen appears.

3. Using the wheel, select (highlight) FORMAT and press the ENTER/MARK or ►► button.

   Set the file format.

   ![Format Options]

   Using the wheel, select one of the following options.

   Options: BWF 24bit, BWF 16bit (default value), WAV 24bit, WAV 16bit, MP3 320k, MP3 256k, MP3 192k, MP3 128k, MP3 96k, MP3 64k, MP3 32k

   **NOTE**

   - BWF is a format created for broadcasting that has the same sound quality as the standard WAV format. It also uses the same .wav file extension as WAV files. In this manual, we distinguish these file types by using the terms BWF and WAV.
   - The WAV and BWF formats offer higher quality recording than MP3 files.
   - The MP3 format can record for longer hours compared to the WAV and BWF formats.
   - With MP3 format, recording with higher values offers better quality.

4. Press the ►► button to highlight the item.
5. Using the wheel, select (highlight) SAMPLE and press the ENTER/MARK or ►► button.

   Set the sampling frequency.

   ![Sampling Frequency Options]

   Using the wheel, select one of the following options.

   Options: 44.1k (default value), 48k, 96k

   **NOTE**

   96k cannot be selected for a MP3 format file.

6. Once the setting has been completed, press the 8/HOME button to return to the Home screen.
4 – Recording

Adjusting the input level

Before starting recording, the input level should be adjusted to prevent the recorded sounds or signals from being distorted due to excessively large input signals or from being inaudible due to excessively low input signals compared to noise. In addition to manual adjustment, the unit has the following two level adjustment functions: peak reduction and limiter. Any of these can be used as required. (see “Using the level control function” on page 22)

**TIPS**

*In addition to adjusting the **INPUT** level, try changing the distance and angle between the microphone and the sound source. The angle and distance of the microphone can also change the sound quality.*

1. In the Home screen mode, press the **INPUT LEVEL** button at the right side panel to make the **INPUT LEVEL** setting screen pop up.
   All the **TRACK/INPUT** indicators start flashing.

2. Press the **TRACK/INPUT** button at the top panel to select a channel for adjusting the input level.
   The selected **TRACK/INPUT** indicator starts flashing.

3. Use the **INPUT LEVEL** volume of the right side panel to adjust the input level.

When the input sound is too loud, the **PEAK** indicator of the top panel is lit in red.

A ** mark is provided at the “−12 dB” position on the level meters.

Set the input level so that the level changes near this mark without causing the **PEAK** indicator to light in red.

4. Press the **INPUT LEVEL** button at the right side panel or the 8/HOME button at the top panel to return to the HOME screen.

**NOTE**

*When in recording standby or during recording, the speaker does not output sound even if the **SPEAKER** setting is enabled.*

If you need to monitor sound to adjust the input level and make recordings, connect the headphone to the **/LINE OUT** jack.

To adjust monitor sound, go to the Home screen and use the **OUTPUT LEVEL** button at the left side panel. Adjusting the monitor sound will not affect the recording quality.

Set the input gain

When an external input is selected for the input source, select the option for the **EXT IN** switch at the right side panel to suit the connected external device.

**MIC+PHANTOM:**

Use this setting when connecting condenser microphones that require phantom power (+24V or +48V) to the recorder.

**MIC:**

Use this setting when connecting microphones to the recorder.

**LINE:**

Use this setting when connecting line output jacks of external devices to the analog inputs of this recorder.

When you set it to **MIC+PHANTOM**, a pop-up message appears confirming that you want to turn phantom power on. (see “Using phantom power” on page 18)

Use the **POWER/DISPLAY** screen to set the voltage to +24V or +48V. (see “Set the voltage value of the phantom power supply” on page 53)

**CAUTION**

*Depending on this setting, the input level setting range changes. For this reason, the input level might change greatly when this setting is changed. Before changing it, you should turn the power OFF or turn the output level all the way down.*

Using phantom power

In stop mode, if you change the **EXT IN** switch at the right side panel to **MIC+PHANTOM**, a pop-up message appears confirming that you want to turn phantom power on.

When the confirmation pop-up message opens, press the **ENTER/MARK** button to turn phantom power on for the **EXT MIC/LINE IN** jack and supply phantom power (+24V or +48V) to the connected microphone.

While the confirmation pop-up message is displayed, change the input switch to either **MIC** or **LINE** to close the confirmation pop-up message and turn phantom power off.

Use the **POWER/DISPLAY** screen to set the voltage to +24V or +48V. (see “Set the voltage value of the phantom power supply” on page 53)

**NOTE**

*Battery power will be consumed faster when set to +48V than when set to +24V.*
CAUTION

- Confirm that phantom power is OFF before connecting a line level device to the EXT MIC/LINE IN jack. If you connect a line level device while phantom power is being supplied, that device and this unit could be damaged.
- When connecting to or disconnecting a condenser microphone from the EXT MIC/LINE IN jack, confirm that the phantom power for that jack is OFF. If you connect or disconnect a microphone while phantom power is being supplied, that microphone and this unit could be damaged.
- Turn phantom power ON only when using a condenser microphone that requires phantom power.
- Supplying phantom power to some ribbon microphones will break them. If you are unsure, do not supply phantom power to a ribbon microphone.
- When using USB bus power, the unit might not be able to supply phantom power depending on the computer. If this occurs, use the dedicated AC adapter (GPE053B) supplied with the unit instead.
- Some condenser microphones will not operate when phantom power is set to +24V.
- Do not connect or disconnect the AC adapter when using phantom power. Even when the battery were inserted in the unit, the power might be cut off, causing data being recorded to be damaged or lost.

Settings in the “INPUT SETTING” screen

The contents of the INPUT SETTING screen displayed by pressing the INPUT button vary depending on which mode to be selected between 4CH mode and MTR mode.

NOTE

Change the setting for LINK in the track display to ON and the content displayed in the lower part of the INPUT SETTING screen changes.
Set track linkage (4 CH mode only)

Track linkage can be established between track 1 and track 2 or between track 3 and track 4.
The settings in the INPUT SETTING screen are shared by the linked tracks.

1. Press the INPUT button to show the INPUT SETTING screen.
2. Press the TRACK/INPUT button at the top panel to show the INPUT SETTING screen for the track to establish linkage for.
3. Using the wheel select (highlight) LINK and press the ENTER/MARK or ► button.
4. Use the wheel to set the track linkage.
   Options: OFF (default value), ON
5. Once the setting has been completed, press the ■/HOME button to return to the Home screen.

NOTE

LINK can be set or changed even during recording standby and when recording.

Set the track input (MTR mode only)

1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) Mode and press the ENTER/MARK or ► button.
   The Mode screen is displayed.
3. Press the ENTER/MARK or ► button.
   
   ![Mode screen]

   

4. Using the wheel, set the mode to MTR mode and press the ENTER/MARK button.
   Options: 4 CH (4 CH mode, default value), MTR (MTR mode)
5. Press the INPUT button to show the INPUT SETTING screen.
6. Press the TRACK/INPUT button at the top panel to show the INPUT SETTING screen for the track to set the track input for.
7. Using the wheel, select (highlight) INPUT and press the ENTER/MARK or ► button.
8. Using the wheel, select (highlight) INPUT and press the ENTER/MARK or ► button.

   ![INPUT SETTING screen]

   

9. Use the wheel to set the track input.
   Options: OFF, INT L (Tr1 default value), INT R, EXT 1, EXT 2
10. Once the setting has been completed, press the ■/HOME button to return to the Home screen.

NOTE

The INPUT setting cannot be used when recording.
### DELAY setting

Correct a time delay that occurs when the built-in microphones are far away from an external microphone.

1. Press the INPUT button to show the INPUT SETTING screen.
2. Press the TRACK/INPUT button at the top panel to show the INPUT SETTING screen for the track to set DELAY for.
3. Using the wheel select (highlight) DELAY and press the ENTER/MARK or ➤ button.

4. Use the wheel to set a value according to the distance of the connected microphone.
   - Options: 0ms (0m) (default value) to 300ms (103m)
5. Once the setting has been completed, press the ■/HOME button to return to the Home screen.

### Set the low-cut filter

The low-cut filter can reduce noise such as offensive wind noise from air-conditioners and projectors.

1. Press the INPUT button to show the INPUT SETTING screen.
2. Press the TRACK/INPUT button at the top panel to show the INPUT SETTING screen for the track to set the low-cut filter for.
3. Using the wheel select (highlight) LOW CUT and press the ENTER/MARK or ➤ button.

4. Use the wheel to set the cut-off frequency of the low-cut filter for microphone input.
   - Options: OFF (default value), 40Hz, 80Hz, 120Hz, 220Hz
5. Once the setting has been completed, press the ■/HOME button to return to the Home screen.

**CAUTION**

Use headphones to monitor when you are recording with a microphone. If you use speakers for monitoring, the sound output from the speakers could be picked up by the microphone, resulting in unwanted recording or feedback noise.

**NOTE**

LOW CUT can be set or changed even during recording standby.

**TIPS**

This unit has a built-in reverb, which can be applied to the input source as desired. (see “Reverb function” on page 46)
4 – Recording

Using the level control function
You can set the input level for microphone input.
1. Press the INPUT button to show the INPUT SETTING screen.
2. Press the TRACK/INPUT button at the top panel to show the INPUT SETTING screen for the track to set the input level for.
3. Using the wheel select (highlight) LV CTRL and press the ENTER/MARK or ► button.

INPUT SETTING screen when in 4CH mode
4. Use the wheel to set the level to be used.
Options: OFF (default value), LIMITER, PEAK
5. Once the setting has been completed, press the ■/HOME button to return to the Home screen.

NOTE
LV CTRL can be set or changed even during recording standby and when recording.

PEAK REDUCTION
This function is used to automatically lower the input level to an appropriate one when an input sound is too loud. This allows input level setting to be performed easily. The input level can be raised manually if required.

TIPS
• When recording live performances, for example, test for peak reduction may be performed before actual recording. Select the peak reduction mode in recording standby, and maximize the input level. As a test performance is given subsequently, the input gain is reduced to an appropriate level to meet the input signals, and an optimum input level for the performance is set.
• Recording will be stored at this input level if this mode is disabled before starting recording. Otherwise, the input level will continue to be controlled automatically during recording.

LIMITER
This function prevents distortion due to a sudden and excessive input.
This mode is also suited for recording of live performances with large volume changes.
In this mode, you can change the input level manually even during recording.

CAUTION
Distortion of sounds may occur when excessively large input signals come in even if the LIMITER function is activated. If this occurs, reduce the input level manually or move the unit farther away from the sound source.

Record in 4 CH mode
You can connect built-in microphones to external microphones or other equipment to record four independent channels.

Stereo x 1 + mono x 2
channels 1/2 + channel 3, channel 4, or channel 1
channel 2 + channels 3/4
Mono x 4
Channels 1, 2, 3, and 4

Record 4 channels
1. Set the mode to 4 CH mode. (see “Selecting Operation Mode” on page 16)
2. Press the RECORD button to set the recording standby mode.
3. Select the track you want to record by using the TRACK/INPUT button.
   At this point, for the track you want to record into a stereo file, turn the stereo link on. A track not stereo-linked is recorded into a mono file.
4. Press the RECORD button again to start recording.
5. Press the ■/HOME button to stop recording.

How to Set the Stereo Link
• Turn the stereo link for channel 1 and channel 2 on/off. For the TRACK/INPUT button, press both button 1 and button 2 at the same time.
• Turn the stereo link for channel 3 and channel 4 on/off. For the TRACK/INPUT button, press both button 3 and button 4 at the same time.

You can check the status of the stereo link from the track status display in the screen display.
The stereo link can be set for the above combinations only.

NOTE
• When MP3 is selected for FORMAT, recording is not possible by combining mono and stereo files.

File names when recording in 4-channel
In 4-channel recording, a set of two files is created—one for the external microphones connected to channels 1 and 2 and one for the external device or stereo microphone connected to channels 3/4.

<table>
<thead>
<tr>
<th>File name</th>
<th>Channels 1/2</th>
<th>Channels 3/4</th>
</tr>
</thead>
<tbody>
<tr>
<td>TASCAM_0002S12.WAV</td>
<td>1 2</td>
<td>3 4</td>
</tr>
<tr>
<td>TASCAM_0002S34.WAV</td>
<td>1 2</td>
<td>3 4</td>
</tr>
</tbody>
</table>

1: Set with the WORD item on the FILE NAME screen.
2: Recording file base number
3: 5 is the source file
4: Assigned channels (1 2 is channels 1/2 and 3 4 is channels 3/4)
Record in MTR mode

Sounds, etc. can be recorded over an already recorded file in addition to the recording of up to four tracks.
Recorded files are saved as mono x 4.
1. Set the mode to MTR mode. (see “Selecting Operation Mode” on page 16)
2. Select the track you want to record by using the TRACK/INPUT button.
The track selected here goes into recording standby mode.
3. Press the RECORD button to start recording.
4. Press the ■/HOME button to stop recording.

Switch files during recording (track increment, available in 4 CH mode only)

During recording, you can stop recording to the current file either manually or automatically at a set time, and continue to record to a new file (the track increment function).

Manual track increment during recording

During recording, you can easily update a file manually and continue to make recording.
1. Press the ■/HOME button during recording.

NOTE
Numbers at the end of file name will increment each time when a new file is created.

CAUTION
• The maximum total number of folders and files you can create is 5,000.
• Files with a recording time of less than two seconds cannot be created. Moreover, if the sampling frequency is 96 kHz, files shorter than four seconds cannot be created.
• When the name of a new file to be created already exists, the number will be incremented further.

Automatic track increment at specified time

During recording, the DR-44WL will automatically switch recording from the current file to a new file when it reaches a certain time specified in the TRACK INC of the AUTO FUNCTION screen.
Follow the below steps to set the maximum time for automatic increment:
1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) AUTO FUNCTION and press the ENTER/MARK or ■/HOME button.
AUTO FUNCTION screen is displayed.
3. Using the wheel, select (highlight) TRACK INC and press the ENTER/MARK or ■/HOME button.

<table>
<thead>
<tr>
<th>AUTO FUNCTION</th>
<th>TRACK INC</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO MODE</td>
<td>OFF</td>
</tr>
<tr>
<td>TRACK INC</td>
<td>10min</td>
</tr>
<tr>
<td>AUTO INC</td>
<td>15min</td>
</tr>
<tr>
<td>AUTO TIME</td>
<td>60min</td>
</tr>
<tr>
<td>MENU/TIME</td>
<td>60min</td>
</tr>
</tbody>
</table>

4. Use the wheel to select the automatic track increment time.
Options: OFF (default value), 5min, 10min, 15min, 30min, 60min
5. Once the setting has been completed, press the ■/HOME button to return to the Home screen.

CAUTION
The maximum total number of folders and files you can create is 5,000.
4 – Recording

Recording automatically (AUTO REC)

This function automatically start and pause recordings, update files, or add cue marks according to the input sound level.

1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) AUTO FUNCTION and press the ENTER/MARK or ► button.
3. Using the wheel, select (highlight) AUTO REC and press the ENTER/MARK or ► button.

4. Use the wheel to select a start level that activates the AUTO REC function (a level that recognizes incoming signals).
   Options: OFF (default value), -6dB, -12dB, -24dB, -48dB
5. Once the setting has been completed, press the HOME button to return to the Home screen.
6. Press the RECORD button to set to the mode in which the track is selected for recording.
7. Select the track you want to record by using the TRACK/INPUT button.
   At this point, for the track you want to record into a stereo file, turn the stereo link on. A track not stereo-linked is recorded into a mono file.
8. Press the RECORD button to set the recording standby mode.
   Recording starts automatically when the input signal exceeds the threshold set in the AUTO REC item.
9. Press the HOME button to stop recording.

TIPS

By using this in combination with the PRE REC function, you can record events without losing the beginnings of sounds.

CAUTION

• The AUTO-REC function and SELF-TIMER function cannot be used simultaneously.
• The maximum total number of folders and files you can create is 5,000.
• Files with a recording time of less than two seconds cannot be created. Moreover, if the sampling frequency is 96 kHz, files shorter than four seconds cannot be created.
• When the name of a new file to be created already exists, the number will be incremented further.

NOTE

• You can also add marks manually. (see “Manual cue marking during recording” on page 26)
• You can also manually start a new file in the middle of recording. (see “Manual track increment during recording” on page 23)
• Numbers at the end of file name will increment each time when a new file is created.

Start recording a moment before pressing RECORD (PRE REC, 4CH mode only)

By using prerecording, when the unit is in recording standby you can record up to two seconds of the signal input before the RECORD button is pushed to start recording. (PRE REC)

1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) REC SETTING and press the ENTER/MARK or ► button.
   The REC SETTING screen appears.
3. Using the wheel, select (highlight) PRE REC and press the ENTER/MARK or ► button.
4. Using the wheel, turn the PRE REC function on or off. Options: OFF (default value), ON
5. Once the setting has been completed, press the HOME button to return to the Home screen.

TIPS

By combining PRE REC with the AUTO REC function, you will not miss an opportunity to start recording.

NOTE

If you start recording within two seconds from when the record standby mode is turned ON, recording will begin from the record standby mode.
Self-timer function

Similar to a camera, the DR-44WL has a SELF TIMER function to begin recording after a set period of time.

1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) REC SETTING and press the ENTER/MARK or ➪ button.
3. Using the wheel, select (highlight) SELF TIMER and press the ENTER/MARK or ➪ button.
4. Use the wheel to set the waiting time to start recording. Options: OFF (default value), 5 sec, 10 sec
5. Once the setting has been completed, press the 8/HOME button to return to the Home screen.
6. Press the RECORD button to set the recording standby mode. The self-timer icon appears on the recorder status screen, and the time is displayed on the right.
7. Press the RECORD button. Recording will start after the set time period.

NOTE
* The self-timer function will not work when recording is paused during recording.
* The self-timer function and the AUTO REC function cannot be used together.

Simultaneously recording two files at different input levels (DUAL REC, 4CH only)

This recorder can simultaneously record a second recording at a different input level along with the regular recording. For example, when recording with microphones, you can make an ordinary recording with the input level set as high as possible and simultaneously record at a slightly lower input level for safety.

Recorded files are saved as two files: one recorded at the input level of ordinary recording and the other recorded at an input level 12dB lower than that level. In addition, you can record in two different formats (WAV and MP3) simultaneously and create two files.

NOTE
* Make the input level setting for the ordinary recording in the usual manner. (see “Adjusting the input level” on page 18), (see “Set the input gain” on page 18)
* You cannot apply effects to the second file, which is recorded at a different input level or in a different format.

Enabling dual recording

1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) REC SETTING and press the ENTER/MARK or ➪ button.
3. Using the wheel, select (highlight) MODE and press the ENTER/MARK or ➪ button.
4. Use the wheel, to set the recording mode for dual recording.

<table>
<thead>
<tr>
<th>Options</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>OFF (default value)</td>
<td>Record in ordinary stereo mode.</td>
</tr>
<tr>
<td>LEVEL:</td>
<td>Record at two different levels.</td>
</tr>
<tr>
<td>FORMAT</td>
<td>Record in two different formats (WAV and MP3).</td>
</tr>
</tbody>
</table>

5. Press the ➪ button to highlight the item.
6. When FORMAT is selected for the recording mode, move on to the next step. When an item other than FORMAT is selected, press the 8/HOME button to return to the Home screen.
7. Using the wheel, select (highlight) FORMAT and press the ENTER/MARK or ➪ button.
8. Use the wheel to set the MP3 format for dual recording.
Options: MP3 320k, MP3 256k, MP3 192k, MP3 128k, MP3 96k, MP3 64k

9. Once the setting has been completed, press the \HOME button to return to the Home screen.

**NOTE**

- The WAV file format is the setting in ordinary recording.
- DUAL FORMAT can be selected only when the recording format is WAV or BFW, 44.1kHZ and 16 bits or 48 kHz and 16 bits.
- In dual recording, two tracks can be recorded on a stereo-file basis and one track can be recorded on a mono-file basis. You cannot select multiple tracks for the source in dual recording.

### Starting dual recording

Press the RECORD button to start dual recording.

During dual recording, the recording screen appears as follows.

![Recording Screen](image)

In the input source display area of the recording screen, the input levels of the current input source and of the second file for dual recording are shown.

### Dual recording file names

Dual recording allows two files to be created simultaneously. The name of the second file created by dual recording has ".D" added to the name of the file recorded ordinarily.

- **TASCAM_0002S12.WAV**
  - 1: Set with the WORD item on the FILE NAME screen.
  - 2: Recording file base number
  - 3: S is the source file
  - 4: Assigned channels (1 2 is channels 1/2 and 3 4 is channels 3/4)
  - 5: D is the dual recording file

### Create cue marks during recording

In recording or recording standby mode, the DR-44WL can create cue marks to a file to quickly locate the marked position and start playback. (see "Moving to the cue mark position" on page 27)

You can either manually set the cue mark, or automatically set the cue mark level or time to minimize the operation noise.

**NOTE**

The unit will not move to the cue mark position in recording or recording standby mode.

### Manual cue marking during recording

Press the ENTER/MARK button during recording or recording standby to create a cue mark.

The registered pull-up cue mark no. message will appear at the bottom of the screen display.

**NOTE**

- Up to 99 cue marks can be created and stored in each file.
- Cue marks that are created during the recording of WAV file in BWF format by this unit are stored in the file. You can use the cue marks in softwares compatible with BWF format.
- A mark name MARK SET [xx] * is added to a manually created mark.
- [xx] is a serial number common to all marks.
Add cue marks automatically during recording

When you turn the AUTO MARK function ON, cue marks can be added automatically according to the operating level and time.

Add cue marks automatically according to set levels
1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) AUTO FUNCTION and press the ENTER/MARK or ➤ button.
3. Using the wheel, select (highlight) MODE for AUTO MARK and press the ENTER/MARK or ➤ button.
4. Use the wheel to set the automatic cue mark mode to LEVEL.

Options: OFF (default value), LEVEL, TIME
5. Press the ENTER/MARK button to finalize the set mode.
6. Using the wheel, select (highlight) LVL/TIME for AUTO MARK and press the ENTER/MARK or ➤ button.

Options: 5min, 10min, 15min, 30min, 60min (default value)
7. Press the ENTER/MARK button to finalize the set time.
8. Once the setting has been completed, press the ➤ HOME button to return to the Home screen.

Add cue marks automatically according to set time
1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) AUTO FUNCTION and press the ENTER/MARK or ➤ button.
3. Using the wheel, select (highlight) MODE for AUTO MARK and press the ENTER/MARK or ➤ button.
4. Use the wheel to set the automatic cue mark mode to TIME.

5. Press the ENTER/MARK button to finalize the set mode.

Moving to the cue mark position

During pause, you can move to a cue mark registered in the selected file. When multiple cue marks exist, you will move to the nearest cue mark to the present cue mark. You can use this function to go to the beginning of a song, similar to an index.
1. During pause or playback, while pressing the ENTER/MARK button, press the ❯ button or the ➤ button.

NOTE
You cannot move to a cue mark of a different file.
Use MS microphone

The unit is provided with the MS decoder; you can record or play tracks using the MS microphone.
1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) REC SETTING and press the ENTER/MARK or ► button.
The REC SETTING screen appears.
3. Using the wheel, select (highlight) MS DECODE and press the ENTER/MARK or ► button.

4. Use the wheel to set the decoding mode when using a mid-side microphone.

<table>

</tr>
</tbody>
</table>

5. Press the ▶ button to highlight the item.
6. Using the wheel, select (highlight) SOURCE and press the ENTER/MARK or ► button.

7. Use the wheel to set the channel to use a mid-side microphone for.
Options: 1 + 2 CH (default value), 3 + 4 CH
Once the setting has been completed, press the ■/HOME button to return to the Home screen.
## Recording duration

The table below shows the maximum recording time per file format for SD/SDHC/SDXC cards:

<table>
<thead>
<tr>
<th>File format (recording setting)</th>
<th>1GB</th>
<th>4GB</th>
<th>8GB</th>
<th>32GB</th>

</tbody>
</table>

- The recording times shown above are estimates; they might differ depending on the SD, SDHC, and SDXC cards in use.
- The recording times shown above are not continuous recording times, but they are the total possible recording times for the SD, SDHC, and SDXC cards.
- Mono recording in WAV format will double the maximum recording times specified above.
- For DUAL REC recording in the WAV/BWF format and 4-channel recording, the maximum recording time will be half the figures above.
5 – Operating Files and Folders (4 CH Mode Only)

In the BROWSE screen, you can browse the MUSIC folder (stores audio files), delete files and folders, or create a new folder in the SD card.

**TIPS**

You can also connect the unit with a computer via USB, or directly insert the SD card to the computer to change the configuration of folders or delete files in the MUSIC folder also from the computer. In addition, you can edit file names from the computer.

To open the BROWSE screen, press the MENU button to open the MENU screen. Use the wheel to select (highlight) BROWSE and press the ENTER/MARK or button.

Displayed in this screen are the contents of the folder containing the file selected on the Home screen before the BROWSE screen was opened.

**Screen navigation**

Folders and music files are displayed in a layered-tree type in the BROWSE screen.

The DR-44WL can create up to two layers in each folder.

- Use the wheel to select (highlight) a file or folder.
- When a folder is selected (highlighted), press the button to show the contents of that folder.
- When a file for folder is selected (highlighted), press the button to move one level upward.
- When a file or folder is selected (highlighted), press the quick button to open the following quick pop-up menu.
- While a file is selected (highlighted), press the ENTER/MARK button to return to the Home screen and play back the selected file.
- The folder that contains this file becomes the current folder (the currently selected folder), and recorded files will be saved to this folder.
- While a file is selected (highlighted), press the button to return to the Home screen and load the selected file. The folder that contains this file becomes the current folder (the currently selected folder), and recorded files will be saved to this folder.
- When a folder is selected, press the ENTER/MARK button to return to the Home screen and play the first file in that folder.
- This folder becomes the current folder (the currently selected folder), and recorded files will be saved to this folder.

**Icons on the BROWSE screen**

The meanings of icons that appear on the BROWSE screen are as follows.

- **MUSIC folder**
  In the BROWSE showing the ROOT level, the MUSIC folder is displayed at the top.
- **Audio file**
  This icon appears before the name of a music file.
- **Folder**
  This folder contains a sub-folder.
- **Folder**
  This folder contains no sub-folder.
- **Folder in display**
  Contents of this folder is currently in display.
- **New folder**
  A new folder will be created.

**File operations**

Select (highlight) the desired audio file in the BROWSE screen, and press the Quick button to open the following Quick pop-up menu.

Use the wheel to select (highlight) an item, and press the ENTER/MARK button. Either of the following actions will start according to the selected item.

- **INFORMATION**
  Information about the selected file (date/time, size) will pop up.

Press the HOME button again to return to the BROWSE screen.
FILE DELETE
A pop-up message appears to confirm that the deletion of the selected file.

Press the ENTER/MARK button to delete the file, and press the HOME button to cancel the delete operation.

Folder operations
Select the desired folder on the BROWSE screen and press the QUICK button to open the QUICK pop-up menu that is shown below.

Use the wheel to select (highlight) an item, and press the ENTER/MARK button. Either of the following actions will start according to the selected item.

SELECT
Returns to the Home screen and selects the first file in the folder. In addition, the recorded files are saved in the selected folder.

ALL DELETE
A pop-up message will appear to confirm deletion of all files in the selected folder.

Press the ENTER/MARK button to delete the files, and press the HOME button to cancel the delete operation.

NOTE
Read-only files and unrecognized files by the DR-44WL will not be deleted.

Creating a new folder
A NEW FOLDER is available at the bottom of each folder.

1. Select (highlight) NEW FOLDER, and press the ENTER/MARK or button to confirm creation of a new folder.

2. Press the ENTER/MARK button to create a new folder. Press the HOME button to cancel creation of a new folder.

NOTE
The DR-44WL is not designed to handle folders with three or more layers, and therefore the NEW FOLDER does not exist in a folder with two layers. A newly created folder becomes the current folder (currently selected folder), and recorded files are saved in this folder.
In the MTR mode of this recorder, one track (recording data group) is treated as one song and data is managed on a song basis. For one song, four tracks and a master file after mixing down are saved.

To record or create music, a song being created needs to be loaded or a new song needs to be created.

This chapter describes basic operations such as a method for loading songs and a procedure for creating new songs as well as various functions to manage songs.

### Song Operation

Select (highlight) the desired song file on the SONG screen, and press the QUICK button to open the QUICK pop-up menu below.

Use the wheel to select (highlight) the desired item, and press the ENTER/MARK button. Then, the unit operates as follows:

- **LOAD**
  Loads the selected song.

- **CREATE**
  Creates a new song.

- **INFORMATION**
  Information about the selected song (date/time, size) will pop up.

- **RENAME (V1.10 supported)**
  Edits the name of the selected song.

- **DELETE**
  Deletes the selected song.

---

### Loading Songs

Use the following procedure to load the song you want.

1. Set the mode to MTR mode. (see “Selecting Operation Mode” on page 16)
2. Press the MENU button when the recorder is stopped to open the MENU screen.
3. Using the wheel, select (highlight) SONG and press the ENTER/MARK or ➪ button. The SONG screen will be displayed.

   **NOTE**

   The * icon appears for a song currently being loaded.

4. Use the wheel to select (highlight) the desired song and press QUICK to open the QUICK pop-up menu below.

   **NOTE**

   After selecting (highlighting) the desired song, press the ENTER/MARK button to load the selected song and return to the Home screen.

5. Using the wheel, select (highlight) LOAD and press the ENTER/MARK button.

   The selected song will be loaded, and the pop-up will disappear.

   The icon * will move to the selected song.

6. Press the ➪/HOME button to return to the Home screen.
6- Managing Songs (MTR Mode only)

Creating a New Song

Use the following procedure to create a new song.

1. Set the mode to MTR mode. (see “Selecting Operation Mode” on page 16)
2. Press the MENU button when the recorder is stopped to open the MENU screen.
3. Using the wheel, select (highlight) SONG and press the ENTER/MARK or  button.
   The SONG screen will be displayed.
4. Press the QUICK button to open the QUICK pop–up menu and use the wheel to select (highlight) CREATE.

5. Press the ENTER/MARK button to open the QUICK pop-up menu for setting the format for a new song.

6. Use the wheel to select a format and press the ENTER/MARK button to create a new song.
   Press the  button to return to the SONG screen.

7. Edit the name (title) of the song as necessary. (see “Changing the Song Name (V1.10 supported)” on page 33)

   TIPS
   The song name (title) can also be edited later using RENAME in the QUICK menu. The song name can also be edited when saving the song.

   8. Press the  button to return to the Home screen.

Changing the Song Name (V1.10 supported)

Use the following procedure to change the song name.

1. Set the mode to MTR mode. (see “Selecting Operation Mode” on page 16)
2. Press the MENU button when the recorder is stopped to open the MENU screen.
3. Using the wheel, select (highlight) SONG and press the ENTER/MARK or  button.
   The SONG screen will be displayed.
4. Use the wheel to select (highlight) the song you want to change the name and press QUICK to open the QUICK pop-up menu.

5. When the ENTER/MARK button is pressed, the SONG RENAME screen for changing the song name will pop up.

6. Use the << button and the >> button to move the cursor and use the wheel to change the text.

7. Press the  button to return to the Home screen.
6- Managing Songs (MTR Mode only)

Deleting songs

You can delete songs. We recommend deleting unnecessary songs when the SD card space is low.

1. Set the mode to M TR mode. (see “Selecting Operation Mode” on page 16)
2. Press the MENU button when the recorder is stopped to open the MENU screen.
3. Using the wheel, select (highlight) SONG and press the ENTER/MARK or button. The SONG screen will be displayed.
4. Use the wheel to select (highlight) the song you want to delete and press the QUICK button to open the QUICK pop-up menu.

5. Press the ENTER/MARK button to delete the selected song.

NOTE

• When a song is currently being loaded, the message current song is popped up, and the song cannot be deleted. Load songs other than those to be deleted.
• The “MUSIC” folder must contain at least one song. Therefore, a new song is created when inserting an SD card or formatting.
7 – Playback

### Playback
When playback is stopped on the Home screen, press the ▶/❚ button to start playing.

**NOTE**
You can also choose files for playback by name on the BROWSE screen.

### Pausing
Press the ■/HOME button to pause playback at the current position (pause) when playing a track on the Home screen.
Press the ▶/❚ button again to resume playback from the previous position.

### Stopping
When you press ■/HOME button while a track is being played back on the Home screen, the playback is paused.
Press ■/HOME button again to stop playback at the beginning of a file.

### Fast-rewinding and fast-forwarding (search)
When a file is stopped or played back on the Home screen, press and hold the ◄◄ button or ►► button to fast-rewind or fast-forward and search the played-back file.

**NOTE**
Press and hold the ◄◄ button or ►► button to increase the search speed.

### Moving the playback position
Use the wheel to move the playback position while the playback is stopped or paused on the Home screen.
After you have moved the playback position, the playback is paused.

### Selecting a playback file (skip)
When the Home screen is open, press the ◄◄ button or the ►► button to select the file you want to play.
When you press the ◄◄ button while playback of the file is in progress, it will return to the beginning of the file. When you press the ◄◄ button, it will skip to the beginning of the previous file.
To skip to the next file, press the ►► button at the beginning of in the middle of a file.

**NOTE**
- The track name, file number and other file information for the currently playing track appear on the display.
- When playback was stopped at the beginning of a file, the status ■ icon will appear on the screen. When playback was stopped in the middle of a file, the status ❚❚ icon will appear on the screen.
- To move a file, press the ◄◄ button or ►► button repeatedly as many times as needed.

### Special Playback Control Functions
The unit has some special playback control functions. For example, you can play back a selected section of a track repeatedly or change the tempo of music without changing the pitch. You can also enhance the perceived overall sound pressure for comfortable listening when the playback is indiscernible.
These playback control functions serve for effective practice on musical instruments and analysis of musical passages.

### Playback Control Screen
Use the PLAY FUNCTION screen to set the playback control functions. Loop playback, playback speed change, and key change can be made in this mode.
Set the playback control functions using the following method.
1. While the Home screen is open and the unit is stopped, paused, or playing back, press QUICK to open the QUICK pop-up menu.
2. Using the wheel, select (highlight) PLAY FUNCTION and press ENTER/MARK button.
The PLAY FUNCTION screen is displayed.

3. To set the playback speed and keys, press QUICK to open the QUICK pop-up menu on the PLAY FUNCTION screen and set each item.

4. After you finish making settings on this screen, press the ■/HOME button to return to the Home screen.
7 – Playback

Repeated Playback of Selection (Loop Playback)
With this function, you can continuously repeat (loop) the playback of a selection that you make.

1. When the PLAY FUNCTION screen is open, press the ▶/II button to start playback, and press ENTER/MARK button at the start point of the section that you want to start loop playback.

This position is set as IN (start) point. The icon will light up at the playback position under the playback indicator bar.

2. Press ENTER/MARK button at the end point of the section that you want to start loop playback.

This position is set as OUT (end) point, and the unit will playback the section between the loop playback IN and OUT points. The icon will light up at the playback position under the playback indicator bar.

During loop playback, the icon lights up under the recording status indicator.

Press the ■/HOME button return to the Home screen while maintaining the IN (start) and OUT (end) points and loop settings enabled. On the Home screen, the icon lights up and the icon lights up at the position corresponding to IN (start) and OUT (end) points under the playback indicator bar.

NOTE
- The I/O Too Short pop-up message will appear when the IN-OUT points are too close. Please reset by spacing at least one second in between.
- Press ENTER/MARK button again to clear the IN and OUT points.
- When the PLAY FUNCTION screen is open, press the MENU button to stop loop playback. Press the MENU button again to start loop playback between the set IN and OUT points.
- You cannot set the IN and OUT points in different files.
- The previous IN and OUT point settings are lost when you set the IN point in a different file.
- MP3 files with VBR (variable bit rate) format may affect the accuracy of the IN and OUT points settings.

Clearing IN and OUT points only

1. When the PLAY FUNCTION screen is open, press QUICK to open the QUICK pop-up menu on the PLAY FUNCTION screen.

2. Using the wheel, select (highlight) IN CLEAR or OUT CLEAR and press ENTER/MARK button. The set IN and OUT points will be cleared.

Changing the playback speed (VSA)

The DR-44WL has a built-in VSA (Variable Speed Audition) function to change the playback speed without changing its pitch.

CAUTION
- The VSA function will not work when you select a file recorded at a sampling rate of 96 kHz or three or more tracks exist in MP3. However, the icon is displayed, and the setting of the playback speed can be changed.

To enable the settings of playback speed when a file recorded at a sampling frequency of 44.1 kHz or 48 kHz is loaded by using the ▶/II button or ■/HOME button.

1. When the PLAY FUNCTION screen is open, press QUICK to open the QUICK pop-up menu on the PLAY FUNCTION screen.

2. Using the wheel, select (highlight) SPEED and press ENTER/MARK button. The screen for changing playback speed will be popped up.

3. Use the wheel to change the settings of playback speed. Options: X0.5 - X2.0 (default value: per X1.0, X0.1)

4. Press ENTER/MARK button to finalize the setting and return to open the QUICK pop-up menu on the PLAY FUNCTION screen.

5. Press ■/HOME button to the Home screen while maintaining the set playback speed enabled. When the playback speed is larger than 1.0, the icon appears or when it is smaller than 1.0, the icon appears at the top of the Home screen.

NOTE
- The I/O Too Short pop-up message will appear when the IN-OUT points are too close. Please reset by spacing at least one second in between.
- Press ENTER/MARK button again to clear the IN and OUT points.
- When the PLAY FUNCTION screen is open, press the MENU button to stop loop playback. Press the MENU button again to start loop playback between the set IN and OUT points.
- You cannot set the IN and OUT points in different files.
- The previous IN and OUT point settings are lost when you set the IN point in a different file.
- MP3 files with VBR (variable bit rate) format may affect the accuracy of the IN and OUT points settings.
Key control playback

The DR-44WL can change the playback key (pitch) using its key control function.

In the key control function, the KEY item and FINE TUNE item are available. The KEY item can adjust in ±6 half-tone, and the FINE TUNE item can move the key up or down in ±50 cents.

1. When the PLAY FUNCTION screen is open, press QUICK to open the QUICK pop-up menu on the PLAY FUNCTION screen.
2. Using the wheel, select (highlight) KEY or FINE TUNE and press ENTER/MARK button.

The screen for changing keys will be popped up.

3. Use the wheel to change the key settings.

Options
  - When KEY is selected: ±6 (default value: ±0, per half-tone)
  - When FINE TUNE is selected: ±50 (default value: ±0, per cent)

4. Press ENTER/MARK button to finalize the setting and return to open the QUICK pop-up menu on the PLAY FUNCTION screen.

5. Press ■/HOME button to the Home screen while maintaining the set playback speed enabled.

When the key control function is on, the icon KEY or FINE TUNE appears on the Home screen.
8- QUICK Button Operation

QUICK button overview

The QUICK button allows you to do the following things.
• While the playback is stopped or paused on the Home screen, the QUICK pop-up menu for displaying current file information, setting playback control functions or mixing down will be displayed.

QUICK menu display while playback is stopped or paused when in 4CH mode
During playback, the QUICK pop-up menu for displaying current file information, setting playback control function, or clearing peak hold of the level meters will appear.

QUICK menu display during playback on the Home screen when in 4CH mode
In recording standby or recording mode, the QUICK pop-up menu for displaying current file information or clearing peak hold of the level meters will appear.

QUICK menu display during recording standby on the Home screen when in 4CH mode
• The QUICK pop-up menu for operating the selected file or folder appears on the BROWSE screen or SONG screen. (see “5 – Operating Files and Folders (4 CH Mode Only)” on page 30), (see “6- Managing Songs (MTR Mode only)” on page 32)

Quick menu display on the BROWSE screen when in 4CH mode

NOTE
What appears on the QUICK menu is different in operation, depending on the state of the unit when QUICK is pressed.
• While playback is stopped or paused on the Home screen, the following functions can be selected.

QUICK menu display while playback is stopped or paused when in 4CH mode

Actions of the QUICK button for different screens and statuses are as follows.

Quick menu operation

Press QUICK when the Homes screen is open to display the QUICK pop-up menu. Use the wheel to select (highlight) the desired QUICK menu item, and press ENTER/MARK button to get the unit to work as follows:

NOTE
When the MENU screen or the REC SETTING screen is open for various settings, the QUICK button is disabled.
8- QUICK Button Operation

QUICK menu display while playback is stopped or paused when in MTR mode

INFORMATION (only in 4CH mode):
The current file or song information is displayed.

PLAY FUNCTION:
The PLAY FUNCTION screen is displayed. (see “Special Playback Control Functions” on page 35)

PEAK CLEAR:
Clears the peak level displayed on the level meter.

DELETE (only in 4CH mode):
A pop-up message appears to confirm that you want to delete the current file. (see “Deleting the selected file (Quick Delete, only when in 4CH mode)” on page 40)

DIVIDE (only in 4CH mode):
The current file can be divided. (see “Dividing the selected file (DIVIDE)” on page 40)

MIXDOWN:
This function combines four channels (two or more files) into two right and left channels (one file).
The effect level, volume balance, and right and left positions can be freely set on the MIXER screen. (see “Mixing down” on page 42)

BOUNCE (MTR mode only):
This function can be used to bounce tracks in the current song. (see “Track bounce” on page 41)

TRACK CLEAR (MTR mode only):
This function can be used to delete one track at a time in the current song. (see “Clearing track input (MTR mode only)” on page 41)

MASTER TRACK (MTR mode only):
The master track created can be loaded.

* During playback on the Home screen, the following functions can be selected.

Closing the Quick menu

Press QUICK to close the Quick menu screen.
8- QUICK Button Operation

Deleting the selected file (Quick Delete, only when in 4CH mode)

The currently selected file can be deleted without using the BROWSE screen.
1. Press the  button or the  button to select the file you want to delete.
2. While the Home screen is open when stopped, press QUICK to open the QUICK pop-up menu.
3. Use the wheel to select (highlight) DELETE.
4. Press ENTER/MARK button to open a pop-up menu to confirm that you want to delete a file.

   ![Quick Delete Button Menu]

   1. Press the button or the button to select the file you want to delete.
   2. While the Home screen is open when stopped, press QUICK to open the QUICK pop-up menu.
   3. Use the wheel to select (highlight) DELETE.
   4. Press ENTER/MARK button to open a pop-up menu to confirm that you want to delete a file.

5. Press ENTER/MARK button to delete a file and return to the Home screen.

   Press  button to cancel the delete operation and return to the Home screen.

NOTE
When multiple files are currently selected, multiple files are deleted at a time.

Dividing the selected file (DIVIDE)

A recorded file can be divided into two at a desired position.
1. Use the  button,  button, or the BROWSE screen to select the file you want to divide.
2. While the Home screen is open when stopped, press QUICK to open the QUICK pop-up menu.
3. Use the wheel to select (highlight) DIVIDE.
4. Press ENTER/MARK button again to display the DIVIDE screen.

   ![Divide Screen]

   1. Use the wheel to determine the position where you want to divide the file and press RECORD.
   The following confirmation message will pop-up:

   ![File Divide Confirmation]

   5. Press ENTER/MARK button to return to the Home screen after deleting the file.

   Press  button to return to the DIVIDE screen without dividing the file.

NOTE
- When the DIVIDE screen is open, you can press the  button and set the divide position while playing the track.
- When the DIVIDE screen is open, press the  button to play, the  button to pause, the  button to move to the beginning of a file or the  button to move to the end of a file. Use the wheel to make fine adjustments of the division position.
- After a file is divided, files with _a or _b added to the end of file names will be created.

   (Example of files recorded in 4CH mode)

   File name before division
   140826_0001S12.wav
   140826_0001S34.wav
   
   File name after division
   140826_0001_aS12.wav (before the dividing point)
   140826_0001_aS34.wav (after the dividing point)
   140826_0001_bS12.wav (after the dividing point)
   140826_0001_bS34.wav (after the dividing point)

- When multiple files are currently selected, multiple files are divided at a time.

CAUTION
- Division may not be available when there is not enough space on SD card.
- File name with more than 200 characters cannot be divided.
- File cannot be divided when there is a file name identical to that of the post-divided file.

TIPS
You can add cue marks during recording at the position you want to divide. (see “Create cue marks during recording” on page 26)
8- QUICK Button Operation

Clearing track input (MTR mode only)

1. Set the mode to MTR mode. (see “Selecting Operation Mode” on page 16)
2. Lord the song in which you want to delete tracks on the SONG screen. (see “Loading Songs” on page 32)
3. While the Home screen is open when stopped, press QUICK to show the QUICK menu screen.
4. Using the wheel, select (highlight) TRACK CLEAR and press the ENTER/MARK or \[\rightarrow\] button. 
   The screen for clearing tracks is popped up.
5. Use the wheel to select (highlight) tracks you want to clear and press ENTER/MARK or the \[\rightarrow\] button.
   The following confirmation message will pop-up:
6. Press ENTER/MARK button to return to the Home screen after deleting the selected tracks.
   Press the \[\leftrightarrow\] /HOME button to return to the Home screen without clearing tracks.

Track bounce

Use the track bounce (ping-pong recording) function to combine recorded tracks 1 - 4 into one track.
This function allows you to record on tracks 1 - 2 after mixing down tracks 1 - 4 (stereo bounce) or to record on track 1 by mono mixing tracks 1 - 4 (mono bounce).

When recorded on the playback track itself, the original playback track is naturally cleared (the drum part in Track 1 - 2 is overwritten in the illustration above).

Bouncing tracks

1. Set the mode to MTR mode. (see “Selecting Operation Mode” on page 16)
2. On the SONG screen, load songs in which you want to bounce tracks. (see “Loading Songs” on page 32)
3. Press TRACK/INPUT for the track you want to use as bounce destination and make TRACK/INPUT blink.
   To apply stereo bounce by combining 1/2 track and 3/4 track, press two TRACK/INPUT.
   For mono bounce (bouncing to a single track) , press any one of TRACK/INPUT.
4. Press MIXER to open the Mixer screen and adjust PAN knob and the LEVEL knob for each track. (see “Setting the mixer” on page 43)

For mono bounce to odd-numbered track, set the PAN knob to L12. For mono bounce to even-numbered track, set the PAN knob to R12.
Adjust the overall level with the master level knob.
5. When the Mixer screen is open, press MIXER to return to the Home screen.
6. When playback is stopped or paused or when playing back, press QUICK to open the QUICK pop-up menu.
8- QUICK Button Operation

7. Using the wheel, select (highlight) PLAY FUNCTION and press ENTER/MARK button. The PLAY FUNCTION screen is displayed.

8. Set the IN and OUT points of bounce as the loop playback section. (see “Repeated Playback of Selection (Loop Playback)” on page 36)

**NOTE**

When the IN/OUT points are not set, bounce from 00:00:00 to the final point of recording.

9. Press ■/HOME button to return to the Home screen, and press QUICK to open the QUICK pop-up menu.
10. Using the wheel, select (highlight) BOUNCE and press the ENTER/MARK or ➤ button. The following confirmation message will pop-up:

11. Press ENTER/MARK button to start track bounce and return to the Home screen after bouncing. Press the ■/HOME button to return to the Home screen without track bouncing.

### Mixing down

This function is used to merge multiple files into two right and left channels (one file). Adjustments of the effect level (SEND), right and left positions (PAN), volume balance (LEVEL) can be freely set on the MIXER screen. (see “Setting the mixer” on page 43)

1. Use the ◀/▶ button to select file you want to mix down on the BROWSE screen for 4CH operation mode or on the SONG screen for MTR operation mode. (see “Selecting Operation Mode” on page 16)
2. While the Home screen is open when stopped or paused, press QUICK to open the Quick menu screen.
3. Using the wheel, select (highlight) MIXDOWN and press the ENTER/MARK button. The following confirmation message will pop-up:

4. Press ENTER/MARK button to start mixing down return to the Home screen after mixing down. Press the ■/HOME button to return to the Home screen without mixing down files.
5. After completing the above process, the playback screen for the second file that has been mixed down (the last incremented number before mixing down). In this state, press the ➤/■ button to playback the mixed down file.

### Confirming the results of bouncing

Lift the LEVEL knob for the track at the bounce destination and the master level knob (set the LEVEL knob for other tracks to minimum) to play back. After bouncing tracks, tracks other than those bounced can be newly recorded (overwritten).

**TIPS**

If it may be necessary to have the original track at a later date, back up the song data on your computer before bounce (ping-pong recording). (see “11 – Connecting with a computer” on page 47)
The mixer functions that can be used for setting a built-in effect, right and left positions and volume balance for each channel are available.

Recording sound can be finely changed by setting these during mixing down or playback. (see “Mixing down” on page 42)

### Setting the mixer

1. When the Home screen is open, press **MIXER** to open the Mixer screen.

   ![Mixer Screen](in 4CH mode)

   - **SEND** 0 - 100
     - Adjusts the forwarding level of the selected reverb (see “Reverb function” on page 46).
     - (0: Minimum to 100: Maximum)

   ![Mixer Screen](Stereo Link is set)

   - **PAN** L12 - C - R12
     - Adjusts the balance between the right and left channels. (L12: Left - C: Center - R12: Right)

   ![Mixer Screen](MS decoder is used)

   - **LEVEL:** 0 - 100
     - Adjusts the volume balance between the right and left channels. (0: Minimum to 100: Maximum)

   - **RTN** 0 - 100
     - Adjusts the overall volume of reverbed signals sent via SEND from each track.

2. Use the **wheel** to select (highlight) an item you want to change.

3. Press **ENTER/MARK** button to pop up setting items and settings on the left.

4. Use the **wheel** to change the setting.

<table>
<thead>
<tr>
<th>Items</th>
<th>Options</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>SEND</td>
<td>0 - 100</td>
<td>Adjusts the forwarding level of the selected reverb. (0: Minimum to 100: Maximum)</td>
</tr>
<tr>
<td>PAN</td>
<td>L12 - C - R12</td>
<td>Adjusts the balance between the right and left channels. (L12: Left - C: Center - R12: Right)</td>
</tr>
<tr>
<td>LEVEL</td>
<td>0 - 100</td>
<td>Adjusts the volume balance between the right and left channels. (0: Minimum to 100: Maximum)</td>
</tr>
<tr>
<td>RTN</td>
<td>0 - 100</td>
<td>Adjusts the overall volume of reverbed signals sent via SEND from each track.</td>
</tr>
</tbody>
</table>

5. Press the **ENTER/MARK** button to return to the original position where you can select the position to change the setting next time.

### NOTE

- **Operation is available in any mode when playing back, stopped, paused, or in recording standby or recording.**
- **While the Mixer screen is open, press the ▶️/⏸️ button to play back or press ■/HOME button to pause the playback.**
Tuner function (compatible with V1.10)

A guitar and wind instruments can be tuned using a built-in chromatic tuner.

The tuner incorporated into this unit has chromatic tuner mode that allows tuning of musical instruments while looking at the tuning meter and oscillator mode that outputs reference sounds.

Chromatic tuner

1. Connect a guitar or bass to the 1/L connector of the EXT MIC/LINE IN jack.
   You cannot tune if you connect it to the 2/R connector. Tune wind instruments using the built-in microphone.
2. Press the MENU button to open the MENU screen.
3. Using the wheel, select (highlight) TOOLS and press the ENTER/MARK or >> button.
   TOOLS screen appears.
4. Using the wheel, select (highlight) TUNER and press the ENTER/MARK or >> button.
   TUNER screen appears.
5. Using the wheel, select (highlight) MODE and press the ENTER/MARK or >> button.
6. Use the wheel to set tuner mode to CHROMATIC.
   Options: CHROMATIC (default value), OSC.
7. Using the wheel, select (highlight) SOURCE and press the ENTER/MARK or >> button.
8. Use the wheel and ENTER/MARK button to set the input destination you want to tune sounds.

<table>
<thead>
<tr>
<th>Options</th>
<th>Input destination</th>
</tr>
</thead>
<tbody>
<tr>
<td>INT L</td>
<td>Input from the built-in microphone</td>
</tr>
<tr>
<td>(default value)</td>
<td></td>
</tr>
<tr>
<td>EXT 1</td>
<td>Input from the 1/L connector of the EXT MIC/LINE IN jack</td>
</tr>
</tbody>
</table>

NOTE

To use EXT 1, set the EXT IN switch to LINE.

9. Using the wheel, select (highlight) CALIB and press the ENTER/MARK or >> button.
10. Use the wheel and ENTER/MARK button to set the fundamental frequency of the A.
    Options: 435Hz - 445Hz (default value: 440 Hz)

11. Perform tuning by playing a musical instrument.
    The note that is closest to the sound you played is shown at the top of the tuning meter.
    Tune the musical instrument so that the note you want to match is shown and the center of the tuning meter lights up.
    A bar appears on the left or right of the center if the sound is lower or higher than the target pitch. The bar becomes longer as the sound shifts away from the target pitch.

When the sound played matches the note exactly, >> on the right and left of the note lights up.
12. Once tuning has been completed, press HOME button to return to the Home screen.

Oscillator mode

1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) TOOLS and press the ENTER/MARK or >> button.
   TOOLS screen appears.
3. Using the wheel, select (highlight) TUNER and press the ENTER/MARK or >> button.
   TUNER screen appears.
4. Using the wheel, select (highlight) MODE and press the ENTER/MARK or >> button.
5. Use the wheel to select tuner mode to OSC.
   Options: CHROMATIC (default value), OSC.
6. Press ENTER/MARK or >> button to change the TUNER screen to the oscillator mode display.

The following settings can be made in the oscillator mode display.

NOTE

Set the sound to output.
The setting range is from C3 to B5. (default value: A4)

LEVEL

Set the output level.
The setting range is from 10 (minimum) to 100 (maximum), (default value: 50)
7. Use the wheel and ENTER/MARK button to set NOTE and LEVEL.
8. Use the wheel and ENTER/MARK button to set SOUND to ON so that reference sound is output.

9. Once tuning has been completed, set SOUND to OFF and press 8/HOME button to return to the Home screen.

Metronome function (compatible with V1.10)

Metronome operates when the METRONOME screen is open.

1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) TOOLS and press the ENTER/MARK or button.
   TOOLS screen appears.
3. Using the wheel, select (highlight) METRONOME and press the ENTER/MARK or button.
   The METRONOME screen is displayed.

4. Use the wheel to select (highlight) items you want to set and press ENTER/MARK or the button.
   TEMPO
   Set speed between 20 - 250 (BPM).
   (default value: 120)
   BEAT
   Set beat between 1 - 12 (default value: 4)
   This will accent the first beat.
   SOUND
   Set beat between 1 - 3 (default value: 1)
   LEVEL
   Set the metronome volume between 0 and 127.
   (default value: 100)
5. Use the wheel to set the selected value.
6. Press the button to operate the metronome according to the setting made in Step 4.

7. Once the setting has been completed, press the 8/HOME button to return to the Home screen.

**NOTE**

- During operation of metronome, the metronome sound is monitored on speakers that are externally connected and recorded using a microphone, the metronome sound may also be recorded.
- During operation of metronome, LEVEL can be adjusted on the METRONOME screen, but other items cannot be changed.
- When you record rhythm guitar and bass at the beginning of recording, you can use metronome as a guide click.
- When you practices using metronome, play a song in which nothing is recorded or play a song with the LEVEL knob for each track lowered.
Reverb function

A reverb is incorporated into this unit. When recording or practicing, the input signal can be reverbed or the playback signal can be reverbed during playback. When reverb function is ON, the \text{REVERB} icon will appear at the top of the home screen.

<table>
<thead>
<tr>
<th>REVERB icon</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="REVERB Icon" /></td>
</tr>
</tbody>
</table>

Setting the reverb function

1. Press the \text{MENU} button to open the \text{MENU} screen.
2. Using the \text{wheel}, select (highlight) \text{REVERB} and press the \text{ENTER/MARK} or \text{button.}
   The \text{REVERB} screen is displayed.

<table>
<thead>
<tr>
<th>REVERB screen</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="REVERB Screen" /></td>
</tr>
</tbody>
</table>

There are four setting items on the \text{REVERB} screen as shown in the illustration above.

Use the wheel and \text{ENTER/MARK} button to set each item.

- **REVERB:** Set the reverb on/off status (default value: \text{OFF}).
- **TYPE:** See the reverb type from the pre-set items. See (see “Reverb type pre-set list” on page 46) for more details on reverb types.
- **LEVEL:** You can change the reverb output level selected in the \text{PRESET} item. Settings can be selected from 0 - 100. (default value: 70)
- **SOURCE:** You can select input/output source to be reverbed from the following: (default value: \text{MIX})

<table>
<thead>
<tr>
<th>SOURCE (options)</th>
<th>Detail</th>
</tr>
</thead>
<tbody>
<tr>
<td>MIX (default value)</td>
<td>Reverb the output sound when recording or mixing down.</td>
</tr>
<tr>
<td>INT MIC</td>
<td>Reverb the input sound from the internal microphone.</td>
</tr>
<tr>
<td>EXT IN</td>
<td>Reverb the input sound from the external microphone or external devices.</td>
</tr>
</tbody>
</table>

3. Use the \text{wheel} to select (highlight) the desired item and press the \text{ENTER/MARK} or \text{button to set options/values.}

4. Use the \text{wheel} to set the desired option/value.
5. Press the \text{button} to bring to the setting item mode.
6. Once the setting has been completed, press the \text{HOME} button.

\text{CAUTION}

When sampling frequency is set to 96 kHz or the WAV file with 96 kHz sampling frequency is played back, the reverb function does not work. In this case, reverb can be set.

### Reverb type pre-set list

<table>

</table>
By connecting this unit with a computer using the USB cable, you can transfer audio files on the SD card in the unit to a computer, as well as transfer audio files on the computer to the SD card in the unit.

This unit can handle audio files of the following formats.

- **WAV**: 44.1k/48k/96kHz, 16/24 bit
- **BWF**: 44.1k/48k/96kHz, 16/24 bit
- **MP3**: 44.1k/48kHz, 32k/64k/96k/128k/192k/256k/320kbps

**NOTE**
- Instead of connecting the DR-44WL to a computer via USB, you can remove the SD card from the unit and insert directly (or with a card adapter) to the computer and make the same operation.
- Both WAV and BWF files will have the “.wav” extension.

**CAUTION**
- The DR-44WL will not operate when STORAGE is selected (highlighted) under USB connection.
- Please make a direct connection with the computer without using a hub.

When you connect a USB cable while the unit power is on, or turn on the power after making a connection, the USB SELECT screen will pop up, prompting the user to select either to operate the unit with USB bus power or make a USB connection with the computer.

Use the wheel to select (highlight) STORAGE, and press ENTER/MARK button to connect the unit with the computer. The message of **USB connected** appears.

Make sure that an SD card has been inserted properly into the DR-44WL.

**NOTE**
- Power is supplied from the USB port if the USB cable is connected to the unit that contains batteries (USB bus power prioritized).

If USB connection is made when the SD card is not inserted correctly, a pop-up message of Can’t Save Data will appear.

When you open “computer”, DR-44WL appears on the computer screen as an external drive with a volume label of “DR-44WL”.

### Transferring files to a computer

1. When you click the “DR-44WL” drive on the computer screen, the “MUSIC” and “UTILITY” folders will appear.
2. Open the “MUSIC” folder and drag & drop the file you want to transfer to the desired location.

### Transferring files from a computer

1. When you click the “DR-44WL” drive on the computer screen, the “MUSIC” and “UTILITY” folders will appear.
2. Drag & drop the audio file from the computer to the “MUSIC” folder.

**TIPS**
- You can manage the “MUSIC” folder on computer screen.
- You can create a sub-folder in the “MUSIC” folder. The DR-44WL can create up to two layers. The DR-44WL cannot recognize sub-folders and files located at the third layer level or below.
- If you name sub-folders and music tracks, these names will appear on the Home screen or BROWSE screen of this unit.

### Disconnecting the unit from a computer

When disconnecting the DR-44WL from the computer, make sure to follow the correct steps and remove the USB cable. The power turns off after the unit completes its shutdown (standby) process. See the computer’s operation manual for instructions on how to unmount an external volume.
12 – Using Wi-Fi

Connect the unit and smart phone via Wi-Fi

**CAUTION**

The DR-44WL designs are in conformance with the laws and regulations of the countries and regions in which this unit is sold, and labeled as required.

The DR-44WL is approved in the following countries and regions:
- United States, Canada, Europe (EU member states),
- Australia, New Zealand, Japan

Use of wireless functions may be restricted in countries other than listed above. Please ensure to check the local laws before use.

**TIPS**

The battery will drain faster during Wi-Fi use.

Running out of batteries during data transfer will terminate the process and may result in transfer failure.

We recommend using either the AC adapter or USB bus power during Wi-Fi use.

The DR-44WL is designed for remote control with the use of an exclusive application (DR CONTROL), free of charge. Transport control such as playback and stop, as well as input level adjustment and file transfer can be made via Wi-Fi.

How to download and install the exclusive application (DR CONTROL)

1. Connect your smart phone to the Internet.
2. Search the exclusive application (DR CONTROL) and download from either Google Play (Android smart phone) or App Store (iOS device) for installation.

Connecting the DR-44WL to a smart phone via Wi-Fi for the first time

The DR-44WL can make a Wi-Fi/peer-to-peer connection with a smart phone via Wi-Fi, without the use of a router or other external devices. No Wi-Fi network environment is required. It can make direct connection with your smart phone.

* During Wi-Fi/peer-to-peer connection, the smart phone cannot connect to an external Wi-Fi network.

When using an iOS terminal

1. Press the Wi-Fi button of the DR-44WL; the Wi-Fi indicator will start to flash.
   A pop-up message appears on the display.
2. To make peer-to-peer connection with the smart phone for the first time, press the ENTER/MARK button.

3. The “SSID” and “encryption key” will be displayed and the unit automatically switches to WPS mode.

**NOTE**

The WPS mode is a standard for easy connection between wireless LAN devices. The DR-44WL adopts a push button method for Android devices.

4. In your iOS device, select “setting” → “Wi-Fi”.

5. When Wi-Fi is enabled on for your iOS device, it will display the SSID list of Wi-Fi equipment. Select the SSID displayed on the DR-44WL.

6. The password input screen will appear on your iOS device; enter the encryption key displayed in the DR-44WL.

7. Wi-Fi connection is established between the DR-44WL and your smart phone, and the Wi-Fi indicator of the unit will light.
When using an Android device
1. Press the Wi-Fi button of the DR-44WL; the Wi-Fi indicator will start to flash.
   A pop-up message appears on the display.
2. To make peer-to-peer connection with the smart phone for the first time, press the ENTER/MARK button.
3. The “SSID” and “encryption key” will be displayed and the unit automatically switches to WPS mode.
4. In your Android device, select the “setting” → “Wi-Fi”.
5. When Wi-Fi is enabled on your Android device, it will display the SSID list of Wi-Fi equipment. Select the SSID displayed on the DR-44WL.
6. The password input screen will appear on your Android device; enter the encryption key displayed in the DR-44WL.
7. Wi-Fi connection is established between the DR-44WL and your smart phone, and the Wi-Fi indicator of the unit will light.

**NOTE**
The above description on operating the Android device are for reference only. Please refer to your smart phone’s operation manual for more details.

**Connecting the DR-44WL to a smart phone via Wi-Fi (from second time onward)**

When you establish a connection between the DR-44WL and your smart phone for the first time and need to connect them again, you only need to select the SSID from the second time onward.

**When using an iOS terminal**
1. Press the Wi-Fi button of the DR-44WL; the Wi-Fi indicator will start to flash.
   A pop-up message appears on the display.
2. Your smart phone already made a peer-to-peer connection; simply press the ■/HOME button.
3. Pop-up message on the display disappears and the DR-44WL switches to a standby mode to connect to your smart phone.
4. In your iOS device, select “setting” → “Wi-Fi”.
5. When Wi-Fi is enabled on your iOS device, it will display the SSID list of Wi-Fi equipment. Select the SSID displayed on the DR-44WL.
6. Wi-Fi connection is established between the DR-44WL and your smart phone, and the Wi-Fi indicator of the unit will light.

**When using an Android device**
1. Press the Wi-Fi button of the DR-44WL; the Wi-Fi indicator will start to flash.
   A pop-up message appears on the display.
2. Your smart phone already made a peer-to-peer connection; simply press the ■/HOME button.
3. Pop-up message on the display disappears and the DR-44WL switches to a standby mode to connect to your smart phone.

4. In your Android device, select the “setting” ➔ “Wi-Fi”.

5. When you turn the Wi-Fi on your Android terminal, a Wi-Fi device SSID list appears. Select the SSID shown on the display of the unit.

6. Wi-Fi connection is established between the DR-44WL and your smart phone, and the Wi-Fi indicator of the unit will light.

**NOTE**

The above description on operating the Android device are for reference only. Please refer to your smart phone’s operation manual for more details.

### Using a smart phone to remote control the DR-44WL

The exclusive application (DR CONTROL) uses the same interface of the DR-44WL, so the remote control operation is basically the same as operating this unit. Familiarizing yourself with the DR-44WL operation method will assist you in using the “DR CONTROL” application.

1. When Wi-Fi connection is established between the DR-44WL and your smart phone, tap the installed “DR CONTROL” application.

2. When the “DR CONTROL” application is launched, the following screen will appear on your smart phone to remotely control the DR-44WL.

![Remote control screen](image)

Detailed descriptions on the “DR CONTROL” application, including the “DR CONTROL reference manual”, can be downloaded from the TEAC Global Site (http://teac-global.com).

### File transfer from the DR-44WL to a smart phone

1. Tap the “Browse” button on the “DR CONTROL” screen.

2. The “Browse” screen displays a list of files from the DR-44WL; select the file you want to transfer.

3. Detail screen on the selected file will appear; tap the “Copy” button.

4. A confirmation screen for file copy will appear; press the “YES” button to start file transfer from the DR-44WL to your smart phone.

### Changing password

The password for Wi-Fi connection can be changed for security purpose.

1. Press the **MENU** button to open the **MENU** screen.

2. Using the **wheel**, select (highlight) **TOOLS** and press the **ENTER/MARK** or ➔ button. **TOOLS** screen appears.

3. Using the **wheel**, select (highlight) Wi-Fi and press the **ENTER/MARK** or ➔ button. Wi-Fi screen appears.

4. Using the **wheel**, select (highlight) Wi-Fi and press the **ENTER/MARK** or ➔ button.

5. Each time when you press the **RECORD** button, the password will change.

6. Once the setting has been completed, press the ■/HOME button to return to the Home screen.
View information (INFORMATION)

Use the INFORMATION screen to view various types of information about this unit.

Follow the below steps to display the INFORMATION screen:

1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) SYSTEM and press the ENTER/MARK or ► button. SYSTEM screen appears.
3. Using the wheel, select (highlight) INFORMATION and press the ENTER/MARK or ► button.

The PROJECT page of the INFORMATION screen will appear.

The INFORMATION screen contains the following pages:

4. Use the wheel to change the page.

The following information appears on each page:

PROJECT page:
- Displays information about the currently loaded audio file.

CARD/SYSTEM page:
- Displays information on the inserted SD card, system settings and firmware version of the unit.

Card and system information page (CARD/SYSTEM)

CARD and SYSTEM pages display information on the inserted SD card, system settings and firmware version of the unit.

TOTAL MUSIC
Displays the number of playable files in the music folder.

TOTAL FOLDER
Displays the total number of folders in the music folder.

TOTAL SIZE
Shows the total SD card capacity.

USED SIZE
Displays the amount of used capacity on the SD card.

REMAIN SIZE
Displays available free space of the SD card.

System Ver.
Displays the system's firmware version.

Wi-Fi
Displays the Wi-Fi connection status.

File information page (PROJECT)

The PROJECT page displays information on the currently loaded audio file.

TITLE/FILE1-4
Shows the file name.

If an MP3 file has ID3 tag title information that information appears.

FORMAT
Shows the audio file type.

For WAV and BWF files, bit length, stereo/mono, and sampling frequency (Hz) also appear.

For MP3 files, the bit rate (kbps), CBR (constant bit rate) or VBR (variable bit rate) type, and sampling frequency (Hz) also appear.

(CBR: Constant Bit Rate, VBR: Variable Bit Rate)

DATE
Date of file creation

TIME
Time of file creation

SIZE
File size
13 – Settings and Information

Configuration (SYSTEM)

The SYSTEM screen allows you to initialize the setting of the unit and format the SD card.

Follow the below steps to display the SYSTEM screen:
1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) SYSTEM and press the ENTER/MARK or ➪ button. SYSTEM screen appears.

Use ← button and ➪ button, ENTER/MARK button and wheel to make settings for different items.
The following settings for each item can be made in the SYSTEM screen.

Setting the file name type

This unit can set name types of the recording files.
1. Using the wheel, select (highlight) FILE NAME and press the ENTER/MARK or ➪ button. The FILE NAME screen will be displayed.

2. Use ← button and ➪ button, ENTER/MARK button and wheel to make settings for different items.
The following settings for each item can be made in this screen.

File name type

In the TYPE item, select either the DATE or WORD options.
Options:
   DATE (default value): dates will be included in file name.
   Example: 140101_0001S12.wav

   WORD: the six characters set in WORD will be included in file name.
   Example: TASCAM_0001S12.wav

   NOTE
   The internal clock of the unit is used to set dates. (see “Setting the date/time” on page 14)

Setting characters (WORD)

In the WORD item, use either the ← button or the ➪ button to move the cursor, and turn the wheel to set characters.
In addition to alphabets and numbers, the following characters can be used: ! # $ % & ' ( ) + , - . ; = @ [ \ ] ^ _ ` { } ~

Initializing the numbers (COUNT)

To execute, press ENTER/MARK button in the COUNT INIT item. All newly created files will be assigned with numbers set in the WORD item, starting from the 0001 count.

Restoring the DR-44WL to factory settings

Use the INITIALIZE item to execute initialization; this will restore the unit to factory settings.
1. Using the wheel, select (highlight) INITIALIZE and press the ENTER/MARK or ➪ button to display highlighted EXEC.
2. Press the ENTER/MARK button to open a pop-up confirmation window.
3. Press the ENTER/MARK button to initialize the unit. Press ■/HOME button to cancel initialization.

Completely format a SD card

Use the MEDIA FORMAT item to format the SD card. Formatting will delete all music files in the SD card, and the “MUSIC” folder, the “UTILITY” folder, and the “dr-1.sys” will be created automatically.
1. Using the wheel, select (highlight) MEDIA FORMAT and press the ENTER/MARK or ➪ button to display highlighted EXEC.
2. Press the ENTER/MARK button to open a pop-up confirmation window.
3. Press the ENTER/MARK button to execute the formatting. Press the ■/HOME button to cancel the quick formatting.

CAUTION
When formatting the SD card, make sure that the unit is connected to either the dedicated AC adapter (GPE053B) provided with the unit or the USB bus power from a computer, or operating on fully-charged batteries. Formatting may not complete successfully if the battery runs out.
Power and display settings (POWER/DISPLAY)

Use the POWER/DISPLAY screen to set the power and display of the unit.

Follow the below steps to display the POWER/DISPLAY screen:

1. Press the MENU button to open the MENU screen.
2. Using the wheel, select (highlight) POWER/DISPLAY and press the ENTER/MARK or ► button. The POWER/DISPLAY screen will appear.
3. Use ◀ button and ► button, ENTER/MARK button and wheel to make settings for different items.

The following settings for each item can be made in the POWER/DISPLAY screen.

Auto power save function setting

Use the AUTO PWR SAVE item to set the time for automatic turn-off (standby mode), counting from the last operation.

Options: OFF (no automatic turn-off), 3 min, 5 min, 10 min, 30 min (default value)

Battery type settings

Use the BATTERY TYPE item to set the battery type.

This setting is used to display the remaining battery power and to calculate the minimum capacity for normal operation.

Options: ALKAL (alkaline batteries, default value), Ni-MH (nickel-metal hydride batteries)

Set the voltage value of the phantom power supply

Use the PHANTOM VOLT item to set the voltage value of the phantom power supply to connect an external microphone that requires phantom power.

Options: +24 V, +48 V (default value)

NOTE

Battery power will be consumed faster when set to +48 V than when set to +24 V.

Backlight setting

Use the BACKLIGHT item to set the time for automatic turn-off of back-light in battery operation, counting from the last operation.

Options: OFF (turned off), 5 sec (default value), 10 sec, 15 sec, 30 sec, ALWAYS (always turned on)

Adjusting the display contrast

Use the CONTRAST item to adjust the display contrast.

Options: 1-20 (default value: 8)

Set the peak hold

Use the PEAK HOLD item to set the peak display of the level meter.

Options: OFF, 1 sec (default value), HOLD
The following is a list of pop-up messages. DR-44WL displays pop-up messages according to situations. Refer to this list when you want to know the meaning of each message and a method of dealing with a problem.

<table>
<thead>
<tr>
<th>Message</th>
<th>Details and solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Battery Empty</td>
<td>The batteries are empty. Replace the batteries.</td>
</tr>
<tr>
<td>Can’t Divide</td>
<td>The selected division point is not appropriate for DIVIDE action. (Beginning of a file, end of a file)</td>
</tr>
<tr>
<td>Card Error</td>
<td>The SD card cannot be recognized properly. Replace the card.</td>
</tr>
<tr>
<td>Card Full</td>
<td>The SD card has no remaining capacity. Erase unnecessary files or transfer them to a computer.</td>
</tr>
<tr>
<td>Current File MP3</td>
<td>MP3 files cannot be divided.</td>
</tr>
<tr>
<td>Dup File Name</td>
<td>The name of the DIVIDE file to be created is identical to the name of the file that already exists in the same folder. The DIVIDE function adds &quot;_a&quot; or &quot;_b&quot; to the end of the file name. Before using the DIVIDE function, connect the DR-44WL to a computer and edit the file name.</td>
</tr>
<tr>
<td>File Full</td>
<td>The total number of folders and files exceeded the limit (5000). Delete unnecessary folders and files or move them to a computer.</td>
</tr>
<tr>
<td>File Name ERR</td>
<td>The DIVIDE function would cause the file name to exceed 200 characters. The DIVIDE function adds &quot;_a&quot; or &quot;_b&quot; to the end of the file name. Before choosing the DIVIDE function, connect the unit to a computer and edit the file name to less than 198 characters.</td>
</tr>
<tr>
<td>File Not Found</td>
<td>The file cannot be found or damaged. Check the target file.</td>
</tr>
<tr>
<td>File Not Found Make Sys File</td>
<td>System files required to operate the DR-44WL is missing. When this message appears, press the ENTER/MARK button to automatically create a system file.</td>
</tr>
<tr>
<td>File Protected</td>
<td>The file is read only and cannot be erased.</td>
</tr>
<tr>
<td>Format Error Format CARD</td>
<td>The SD card is not formatted properly or the card may be broken. This message also appears when a computer under USB connection formatted the card, or when an unformatted card is inserted to the unit. Always use the DR-44WL to format cards to be used with it. Replace the SD card with another or press the ENTER/MARK button while this message is being shown to format the card. Formatting will erase all the data on the SD card.</td>
</tr>
<tr>
<td>Invalid Card Change Card</td>
<td>The SD card may be abnormal. Replace the SD card.</td>
</tr>
<tr>
<td>Invalid SysFile Make Sys File</td>
<td>The system file required to operate this unit is invalid. When this message is being displayed, press the ENTER/MARK button to create a new system file.</td>
</tr>
<tr>
<td>I/O Too Short</td>
<td>The IN (start) and OUT (end) points are too close. Re-set by spacing at least one second in between.</td>
</tr>
</tbody>
</table>
When the unit does not operate properly, check the followings before making a repair request. If you still have a problem, contact either the store you purchased the DR-44WL or the TEAC repair center (see the back cover for contact details).

**The power does not turn on.**
- Are batteries low?
- Are batteries inserted correctly with the +, - terminals aligned correctly?
- Confirm that the power plug of the dedicated AC adapter (GPE053B) provided with the unit and a USB connector are securely inserted.
- Is the USB cable connecting the computer for USB bus power securely connected?
- Is the USB hub in use with computer connection for USB bus power?
- Is the HOLD/)&&(I switch set at HOLD?

**The DR-44WL turn the power off automatically**
- Is the automatic power saving function on? (see “Auto power save function setting” on page 53)
- The DR-44WL is in compliance with the European Standby Power Regulations (ErP), and therefore, the automatic power saving function will work whether the unit is being powered by an AC adapter or batteries. Select “OFF” if you do not want to use the auto power saving function (the factory default setting is “30 min”).

**The unit does not function.**
- Is the HOLD/)&&(I switch set at HOLD?
- Is the unit connected to a computer via USB cable (USB Connected)?

**The SD card is not recognized.**
- Confirm that the SD card is inserted completely.

**The DR-44WL don’t play back**
- If the file is WAV format, check whether its sampling rate is compatible with the unit.
- If the file is MP3 format, check whether the bit rate is compatible with the unit.

**The built-in speaker does not emit sound**
- Is a headphone connected to the unit?
- Is the SPEAKER item set as OFF?
- Is the unit in recording or recording standby mode?

**The monitor system does not emit sound**
- Is the monitoring system securely connected?
- Is the monitoring system volume at minimum level?
- Is the OUTPUT LEVEL setting of the unit at minimum level?

**The DR-44WL is not recording**
- Check the connection again.
- Check the input settings again.
- Is the input level low?
- Confirm that the SD card is not full.
- Check whether the number of files has reached the maximum level.

**The input level is too low**
- Is the input level setting too low?
- Is the output level of the connected device too low?

**The sound I want to record is distorted**
- Is the input level setting too high?
- Is reverb setting ON?

**Playback sound is not natural**
- Is the playback speed changed?
- Check the setting status of the playback equalizer.
- Confirm that the level alignment function is not enabled.
- Is reverb setting ON?

**The file cannot be deleted**
- Is the file a copy of a read-only file set by a computer?

**The computer does not display the unit’s files**
- Is the DR-44WL connect to a computer via USB port?
- Is USB hub in use?
- Is the unit in recording or recording standby mode?

**The DR-44WL cannot make a Wi-Fi connection or communication is interrupted**
- Check that the Wi-Fi device is turned ON and/or the Wi-Fi function is ON.
- Is the distance to the Wi-Fi device too far?
- Is there any obstacles in between, for example a wall?
- When a Wi-Fi device is located at the rear side of the DR-44WL, the unit itself maybe the cause of interruption. Try changing the positions of the Wi-Fi device and the unit.
- Turn OFF and restart the DR-44WL.
- Delete the registration of “DR-44WL” in the Wi-Fi device and follow the steps in “Connecting the unit to a Wi-Fi device”.

Requirements for connected computers

Please visit the TEAC Global Site (http://teac-global.com) to learn the latest compatible OS.

Windows machine
Pentium 300 MHz or more
128 MB or more memory
USB port (USB2.0 is recommended)

Macintosh machine
Power PC, iMac, G3, or G4 with 266 MHz or above
64MB or more memory
USB port (USB2.0 is recommended)

Recommended USB host controller
Intel chip set

Supported operating systems
Windows: Windows XP, Windows Vista, Windows 7, Windows 8 (including 8.1)
Macintosh: Mac OS X 10.2 or later

Wi-Fi

Wireless standard
Based on IEEE 802.11b/g/n (2.4 GHz only)

Wireless communication mode
Simple access point (Limited AP)

Security
WPA2-PSK (WPS2.0 compatible)
16 – Specifications

**General**

**Power supply**
- 4 AA batteries (alkaline or NiMH)
- USB bus power from a computer
- Dedicated AC adapter (GPE053B provided with the unit)
- Dedicated AC adapter (TASCAM PS-P515U; sold separately)

**Power consumption**
- 2.5W (maximum)

**Battery operation time (continuous operation)**
- Alkaline batteries (Evolta)
